Please read the "Perpetual End User License Agreement" then select the "I accept the terms..." option. Click the **OK** button to continue.

Select the "Typical Setup Type" option at the top of the "Setup" screen. This is the best choice as it will install all of the McAfee features and offer the best protection against viruses. Click **Next**.

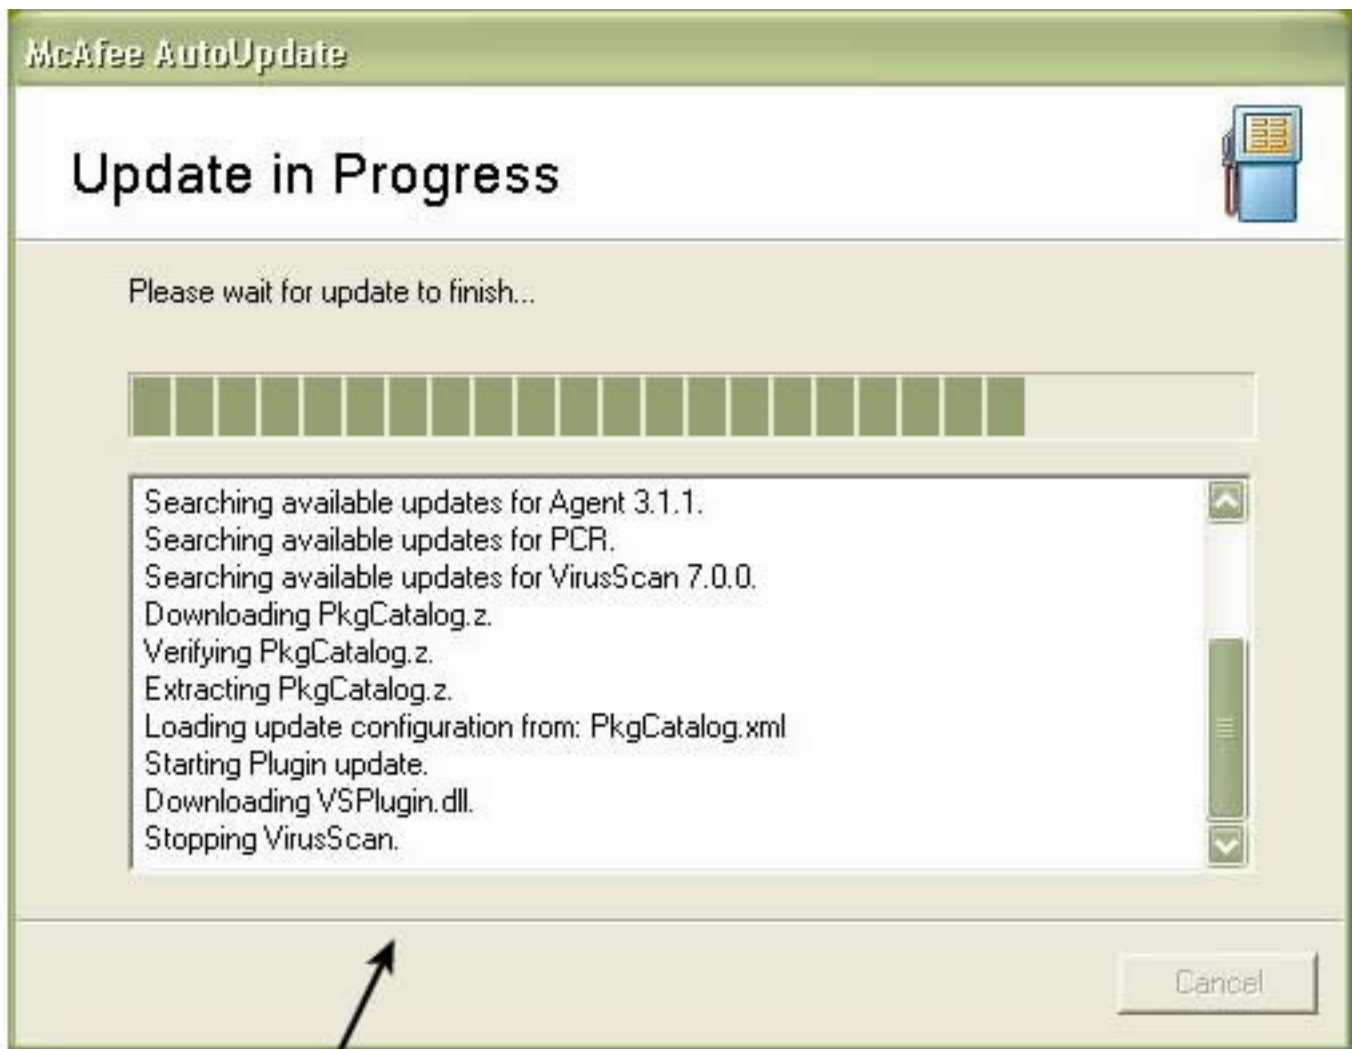

You are now ready to install McAfee on your computer!
Click the **Install** button to start.

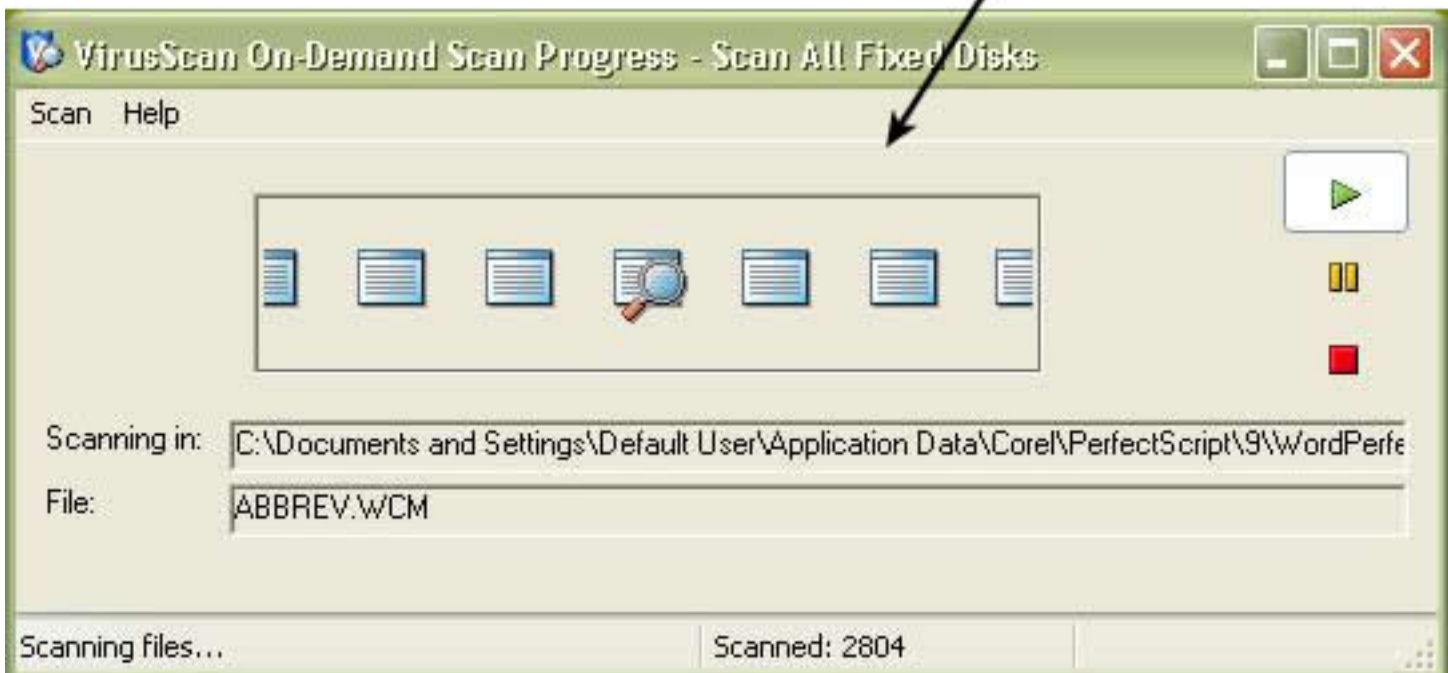

A "Status" bar will appear. Depending on the speed of your computer, this may take several minutes.

Once the installation is complete, check the "Update Now" and "Run On-Demand Scan" check boxes and click the **Finish** button. This will update the virus definition list and to run a virus scan to determine and remove any viruses that may have already infected your computer. Depending on the speed of your computer, this may take several minutes to complete.

McAfee will then AutoUpdate the virus definition list to assure that your computer is protected against the latest viruses, and then run the scan for viruses. Once this has finished, your computer will then be protected against any past or current viruses using McAfee 7.0 Enterprise Edition!
