The "professional engineer," as defined by recent changes in the New York State Education law, is a person licensed to practice engineering in this state. Engineering degrees are generally offered in specialized areas such as chemical, civil, electrical, and mechanical engineering. The profession is regulated by laws that ensure the safety and health of the public.

The primary goal of this program is to provide an adequate preparation for those who are preparing for the New York State Engineer's License Examination. The program is designed to help applicants gain the knowledge and skills necessary to pass the examination.

**DO YOU QUALIFY?**

To be eligible for the New York State Engineer's License Examination, an applicant must meet one of the following criteria:

1. Have completed an engineering degree from an accredited university and have five years of acceptable engineering experience.
2. Have completed four years of acceptable engineering experience and have completed an ABET or equivalent engineering technology degree.
3. Have completed an engineering degree from an approved university and have six years of acceptable engineering experience.
4. Have completed a degree in engineering from a regionally accredited university and have twelve years of acceptable engineering experience.

**REGISTRATION**

Mail to: Dr. Ronald J. Alvarez, Continuing Engineering Education, Room 109 Weed Hall, Hofstra University, Hempstead, NY 11549-1130.

Have you previously taken Hofstra Professional Engineering Review Course? Yes No

Course Code Title of Course Tuition

Method of Payment: □ Check payable to Hofstra University □ MasterCard □ Visa □ Expiration Date

Discount □ Yes □ No

Payment □ Voucher Purchase No. □ Signature □ Date

Refund and Withdrawal Policy: If course is canceled due to insufficient enrollment, a full refund will be given to each registrant. All withdrawals must be made in writing before the beginning of each course. The following policies apply:

- Refunds will be made to registrants before the first day of class.
- No refunds will be given after the first day of class.
- Refunds will not be given for any course taken as an in-house workshop.

**FACULTY**

Richard P. Puerzer, B.S., M.S., Ph.D.; Associate Professor of Engineering, Hofstra University; Registered Professional Engineer, New York.

John Liguori, B.S., M.S.; Registered Professional Engineer, New York.

B.C.E., M.S. in C.E., Ph.D.; Program Director

Dr. Ronald J. Alvarez, Continuing Engineering Education, Room 109 Weed Hall, Hofstra University, Hempstead, NY 11549-1130.

**Recent Changes in Professional Engineering Examinations**

The New York State Board of Professional Engineers and Land Surveyors (NPCE) has adopted the Uniform Examinations of Engineers and Land Surveyors. The new examination is designed to assess the knowledge and skills required for the practice of engineering.

The examination consists of two parts: Part A and Part B. Part A, known as the Fundamentals of Engineering (FE) examination, is designed for engineering students and recent graduates. Part B, known as the Principles and Practice of Engineering (PE) examination, is designed for those who have been working in the engineering field for a certain number of years.

The new examination is more rigorous and challenging than the previous examination. It is divided into two parts: Part A and Part B. Part A is taken by engineering students and recent graduates, while Part B is taken by licensed engineers.

The new examination is more rigorous and challenging than the previous examination. It is divided into two parts: Part A and Part B. Part A is taken by engineering students and recent graduates, while Part B is taken by licensed engineers.
