Our Mission

Have a Heart Children’s Cancer Society is a non-profit charity, dedicated to alleviating the financial burden of families with children suffering from cancer. The funds that we raise go directly to assist these families with medical bills, treatments, equipment and household expenses.
Dear Friend:

Did you know that cancer is the leading cause of death among children in the United States? Over ten-thousand kids are diagnosed each year.

Have a Heart Children’s Cancer Society was formed for the sole purpose of improving the quality of life for these courageous children and their families. Our team is dedicated to collaborating with hospitals, medical centers and other non-profit organizations to locate families, who are experiencing financial hardship due to this debilitating disease. Once identified, we are able to assist them with medical bills, treatments, equipment, transportation and household expenses.

By supporting Have a Heart Children’s Cancer Society, you are directly touching the life of a child in need. With your help, we have faith that cancer will someday be a disease of the past. Remember… one person can truly make a difference!

Sincerely,

The Have A Heart Family

Our Process

**First:** We identify families who are financially distressed as a result of their child’s illness via:
- Local Hospitals and Cancer Centers
- Case Sharing with other Non-Profit Charities
- Direct Inquiries or Referrals

**Second:** Potential candidates fill out a written application outlining diagnosis and family’s financial needs.

**Third:** Once approved, Have a Heart will immediately distribute the applicant funds for:
- Medical Treatments and Procedures
- Equipment and Supplies
- Medical Insurance Premiums
- Household Expenses, Transportation, and Lodging

The Facts

❤ Cancer remains the leading cause of death among children under 15 in the United States.

❤ According to the American Cancer Society, over 10,000 children will be diagnosed with cancer every year.

❤ Over 1,500 of those courageous children will lose their battle within twelve months of being diagnosed.
