This course is designed to assist students in expanding their comprehension skills and utilizing them as they become reading detectives. Students analyze text by finding the underlying meaning in various readings. Through hands-on activities, they find evidence to support their answers. Students not only become stronger readers, but also develop a love for reading that they can enjoy inside and outside the classroom.

Using a thematic approach to reading enrichment for the beginning reader, this program is designed for those who enjoy reading as well as those who need extra help. In-class instruction incorporates the use of vocabulary words, reading passages, and language arts skills to enhance the progress of the new reader. Themes include a variety of stimulating experiences that make reading fun and meaningful. Through the use of manipulatives, stories, and auditory and visual experiences, ideas come alive and excite children about reading.

This course focuses on the needs of students who are in kindergarten and want to continue to develop their skills. Additional emphasis is placed on the phonetic instruction of the pre-reader, while sight vocabulary is further enhanced.

Building solid reading skills is essential for all successful students. This course helps students with comprehension, fluency, and decoding skills while increasing and expanding their vocabulary. Our small class environment allows students to feel comfortable and confident engaging in class lessons and discussions. Students will be able to take the skills learned and apply them to everyday reading as well as to school assignments.
