Note: The Asian Studies major is an interdisciplinary major, designed to provide students with a broad understanding of Asian civilizations. Students choose a core of 4 courses in 4 different departments; complete an additional 15 s.h. in Asia-related courses, and complete a minor (typically 18 semester hours) in the discipline of their choice. Typically, our students minor in Japanese, Chinese, History, Political Science, or Religion, but students can select any major. In their senior year, students complete a capstone seminar (ASST 195). Study of an Asian Language is strongly recommended, as is study abroad. The schedule listed above is representative. For current course availability, please see an advisor. Each semester there are generally around 20-25 courses, which can count for Asian Studies credit.
