Getting Started ......................................................28

Visit Hofstra ..........................................................29
At Hofstra, we know that life is all about connections. And we know that you want a college where you can make connections that count: connections that will allow you to meet mentors, colleagues and friends; connections that will help you discover your potential and your passions; and connections that will start you on the right path toward a successful career.

Hofstra University will provide you with countless opportunities to make these connections. Here you will find faculty who place the highest priority on classroom teaching and advising, while continuing their scholarly endeavors. All of our classes are taught by faculty, and classes are small, averaging 25 students. You will not be lost in the crowd, and the connections you make with faculty often extend beyond the classroom. Our faculty regularly meet with students to organize events, discuss career aspirations or graduate schools, and provide advisement.

Connecting with other students is an integral part of the Hofstra experience. Students from all over the United States, and all over the world, come together on a campus that offers more than 140 undergraduate programs of study, and 150 student clubs and organizations. Whether you are in class or involved in planning a campus-wide activity, Hofstra's vibrant campus is a place where people from different backgrounds explore ideas and issues together every day.

You will leave Hofstra with connections and experiences to last a lifetime. From your first day on campus, you will be able to explore career possibilities. Through connections with faculty, Hofstra alumni or our internship program in the New York City area, you will have ample opportunities to explore and discover where your interests lie.

From broadcasting to business to engineering to education, our graduates have achieved success in a broad array of industries. Hofstra University offers all students the connections to live the complete college experience while discovering what the future holds. We invite you to explore whether Hofstra University is right for you.
It’s a lot easier to ask a question in a class of 10 than in a class of 100.

“I was initially indecisive about attending Hofstra, but after sitting in on a class with the Hofstra Up Close program, I was able to see the teaching style of the professors. I knew I would excel in the classes here because they are interactive and challenging.”

Crystal Cohen
Broadcast Journalism major, Class of 2006
Hofstra is large enough to have extensive resources and yet small in ways that matter. We’re large enough to give you access to a library with more than one million volumes, but we know that small classes are important to learning. That’s why we are committed to keeping classes small. With a 14-to-1 student-faculty ratio and an average class size of 25, you’ll get to know your professors and have your questions answered.

Faculty are our teachers, and teaching is their passion. At Hofstra you’ll never see a graduate student leading a class. Classes here are led by professors who are nationally recognized as experts in their fields.

There’s a true meeting of the minds here, as enthusiastic students eager to learn are matched with faculty members who motivate a class and make their subjects come alive. More than 90 percent of our full-time faculty have attained the highest degree in their fields. Generations of Hofstra alumni – 105,000 and counting – have been inspired by our professors, who are scholars, writers, scientists, artists and professionals. These are teachers who have done what they teach, so you will benefit from their real-world experience.

Whether you’ve already decided on a college major or are still thinking about a course of study, Hofstra is a great place for you. All told, Hofstra offers 2,150 courses in 140 undergraduate programs in the liberal arts, sciences, engineering, business, communication, education and the performing arts. We also know that many students change their minds about what they want to study. At Hofstra, it’s easy to change programs or to have a dual major.

“The professors are extraordinary and always willing to spend time with you after class.”

Rich Vizziello
Finance major, Class of 2006
People
You Just Have to Meet

“The best part about teaching is the students. Talking to students – helping them understand, and advising them about their future as professionals.”

Richard C. Jones, Ph.D.
Associate Professor of Accounting,
Taxation and Legal Studies in Business
Frank G. Zarb School of Business
You want a college education that will expose you to viewpoints and experiences different from your own. Throughout your Hofstra experience, you will meet students from a broad variety of cultures and backgrounds. Hofstra students come from all over the United States and the world. Forty-eight percent of last year's freshman class came from outside New York state, with Massachusetts, California and Florida among our top 10 states. This diversity enhances your college experience, as you share ideas, debate points of view and learn from your classmates. So much of what you learn in college comes from the connections you make with other students.

As you join the Hofstra community, you will realize that Hofstra is large enough to allow you to be your own person but not so large that you can't find others who share your passions. With more than 8,000 undergraduate students, you'll never run out of new people to meet, and there are many clubs and organizations to join. You'll find yourself building a broad array of friendships that range from those you meet in class, to those you meet in your residence hall, to those you meet in a club or organization. You'll realize that you're the center of a dynamic web of people and interests uniquely linked to you.

You'll also find yourself connected to our alumni, as you explore internships and mentoring possibilities, and network at on-campus forums with Hofstra graduates who have climbed the ladder of success, whether in business, education, media or the performing arts.

Our students are bright, energetic and adventurous. They're involved in numerous sports and more than 150 student clubs and organizations — not to mention 500 on-campus cultural events a year.

Drama alumni Phil Rosenthal (right) and Monica Horan (left), best known for their work on Everybody Loves Raymond, gave a performance on campus to benefit the Hofstra Scholarship Fund.
Connecting online, Hofstra’s technological edge
At Hofstra, you’ll have ready access to advanced technology, serving as an integral part of your academic life in classrooms and learning and laboratory facilities.

Besides C.V. Starr Hall, where every student seat is linked to the Internet, there are high-tech labs in Hagedorn Hall, which houses the School of Education and Allied Human Services, and broadcast studios in Dempster Hall, home of the School of Communication and one of the largest noncommercial broadcast facilities in the Northeast.

Then there’s the fully computerized 1,200-seat Axinn Library, which contains more than 1.2 million volumes and a vast array of computer-based research databases.

Internet2, a high-speed connection that universities use (separate from the commercial Internet), is designed to foster innovation and collaboration in research, teaching, clinical medicine and network technology. In 2005 Hofstra was the first private university on Long Island to gain access to Internet2. Today, more than 225 universities and other research institutions are connected to this global research and educational network.

Moreover, Hofstra has about 1,500 PC, Macintosh and UNIX workstations in labs and classrooms, not to mention Blackboard, a Web-based learning tool that enables our professors to extend learning via discussion boards, live forums, and streaming audio and video.

**When you add the 21st-century technology that pervades our classrooms to all our other resources, you have a winning combination that promotes success.**
A Hofstra education goes beyond the classroom
PART OF ANY WELL-ROUNDED EDUCATION IS EXPOSURE TO NEW IDEAS. Hofstra University is renowned for the intellectual opportunities it offers beyond the walls of the classroom and the boundaries of the campus.

In 2005 Hofstra hosted one of its celebrated presidential conferences. Former President William Jefferson Clinton and scholars from around the globe convened for an in-depth examination of the Clinton presidency.

The University’s “Great Writers, Great Readings” series has brought to campus former U.S. Poet Laureate Louise Gluck, author Cynthia Ozick, playwright/screenwriter Kenneth Lonergan, essayist/journalist Vivian Gornick and Pulitzer Prize-winning poet William S. Merwin.

Just days after the November 2004 presidential election, third-party candidate Ralph Nader told Hofstra students, “This is a society that does not have an organized expectation [of what society should be like] because there is too much power and too much wealth in too few hands. We need a higher expectation level.”

Andrew Napolitano, Fox News senior judicial analyst (and the youngest life-tenured judge in New Jersey), told students, “The Patriot Act is the most abominable, unconstitutional assault on human rights since the government enacted the Alien and Sedition Acts of 1798.” Judge Napolitano, in a talk titled “Our Civil Liberties During Wartime,” also warned, “Giving away some of your freedoms for safety is a bargain with the devil.”

Still other events range from edgy comics David Chappelle and Lewis Black in concert, to speakers from the financial and business worlds addressing students at the Merrill Lynch Center, to educators offering pointers to prospective teachers at IDEAS (Institute for the Development of Education in the Advanced Sciences) workshops – not to mention our annual Shakespeare Festival.

DAVID HAAS (B.A., Political Science, 2005), former president of Entertainment Unlimited, said some of the standout moments in his Hofstra life included “the Poli Sci trips – to Washington and, in February 2004, to the New Hampshire Democratic primary, where I met Howard Dean, John Kerry and other candidates.” David headed to law school after graduation. His dad, Jules, is a Hofstra alumnus (B.A., Social Science, 1974) and an attorney.

KRISTEN RUCCATANO (History major, Class of 2006) works at Hofstra Concerts and was involved in planning concerts starring Lewis Black, David Chappelle and Maroon 5. She and David were in the same history class (Intellectual History of Europe From the French Revolution to the Present). Like Ben and David, Kristen intends to enter law school, after which she plans an entertainment law career. And she adds, “I’d love to study anthropology in Peru someday.”

BEN SOLIS (dual majors in Political Science and Philosophy, Class of 2007) is Student Government Association president and active in Hofstra Gamers (for videogame buffs), the Philosophy Club, the Prelaw Society and Hofstra Democrats. He’s eyeing a career in international trade and customs law. When at home in Albany, New York, Ben’s interests are more offbeat. “I’m a blacksmith, and I make wine.” Ben enjoys trips to The Metropolitan Opera and hanging out with friends David Haas and Kristen Ruccatano in the same office space at the Student Center.
**PATRICIA AVANCENA** (Biomedical Engineering Science major, Class of 2006) has a research internship at a Manhattan laboratory, arranged through Dr. Sina Rabbany, her favorite professor. Patricia intends to pursue an M.D./Ph.D. and a career in cancer and stem cell research and tissue regeneration. Patricia also enjoys music – from attending The Metropolitan Opera (like Ben) to singing in the choir at Sunday Mass.

**ADRIANNE CAJAYON** (Marketing major, Class of 2006) works with Kristen at Hofstra Concerts. Adrianne’s other extracurricular activities include singing in Sigmacapella, a coed a cappella group. Her career plans are undecided, but she’s mulling over something in either marketing or sports/entertainment.

**RYAN MCCARTHY** (Music major, Class of 2008) is a serious pianist and a big fan of Hofstra Concerts. Ryan, who loves Irish folk music and Irish dancing, recently won first place in an All-Ireland Dance Championship. He says his dreams include opening his own Irish dance school or pursuing a career in music merchandising.
Six schools that comprise Hofstra University:

Liberal Arts and Sciences

A solid foundation

Hofstra College of Liberal Arts and Sciences offers a wide array of courses and majors in the humanities, natural sciences, social sciences and various cultural disciplines, through which you will learn to think, analyze and communicate.

The Division of Humanities consists of comparative literature and languages, drama and dance, English, music, romance languages and literatures, and fine arts, art history and humanities.

Biology, chemistry, computer science, engineering, geology, mathematics, and physics and astronomy are areas under the Division of Natural Sciences, Mathematics, Engineering and Computer Science.

Those interested in the Division of Social Sciences can choose from among such subjects as anthropology, economics and geography, history, Jewish studies, philosophy, political science, psychology, religion, sociology and speech-language-hearing sciences.

Interdisciplinary programs include African Studies, American Studies, Disability Studies, Jewish Studies, Labor Studies, Latin American and Caribbean Studies, LEAP (Legal Education Accelerated Program), Liberal Arts, Liberal Arts Colloquia, Middle Eastern and Central Asian Studies, Military Science, Physician Assistant Studies and Women’s Studies.
New College
A Division of Hofstra College of Liberal Arts and Sciences

Innovation in education

Built on innovative scheduling, a commitment to learning in and out of the classroom, and individualized B.A. programs, New College offers a nontraditional, intellectually challenging liberal arts curriculum designed to prepare you for an exciting future.

Featuring even smaller class sizes than Hofstra generally offers, New College consequently enables more interactivity, flexibility, a close-knit student community and enriched advisement.

In freshman year, the school's students follow a block course schedule – one course at a time, for 3 1/2 weeks, for a total of eight courses per year. Moreover, these courses are linked to site visits and events in the culturally rich New York City area – including plays on and off-Broadway, museums and concerts, field trips, or a visit to the New York Stock Exchange, for example.

In consultation with your adviser, you choose the academic areas that comprise your interdisciplinary concentration. Reflecting your interests in two or more academic disciplines, these could include ancient literature and philosophy, or economics and history, as examples. As a way to deepen your understanding of the world, all New College concentrations require supervised internships and/or study abroad at other accredited institutions.
The School of Communication is composed of the Departments of Audio/Video/Film; Journalism, Media Studies and Public Relations; and Speech Communication, Rhetoric and Performance Studies.

A liberal arts foundation, in conjunction with specialized communication skills, prepares students for careers in the news media, entertainment, corporate relations, and other pursuits in business, government and nonprofit sectors.

There also are many student clubs and organizations affiliated with the school, such as the Radio and Television News Directors Association, the Public Relations Student Society of America, the Hofstra Film Club and the Speech and Debate Team, among others.

The school’s home base is Dempster Hall, which contains the largest noncommercial television soundstage on Long Island, as well as the fully digital noncommercial radio station WRHU, 88.7 FM, serving some four million listeners on campus, on Long Island and in New York City.
In the business of business education

The world of business seeks graduates who not only understand the business environment but also have a well-rounded educational background and command of the written and spoken word.

Offering courses designed to prepare students for leadership roles in profit, not-for-profit and public sector organizations, the school consists of these departments:

- **Accounting, Taxation and Legal Studies in Business**
- **Business Computer Information Systems and Quantitative Methods**
- **Finance**
- **Management, Entrepreneurship and General Business**
- **Marketing and International Business**

The Zarb School is based in the technology-enhanced C.V. Starr Hall, which also houses the recently opened Wall Street-like trading room. It hosts forums featuring business leaders and offers students opportunities to participate in internships with major firms.

The Zarb School is the only institution on Long Island fully accredited in business and accounting by AACSB International.
Honors College

The best of the best

Honors College is an innovative program tailored for our most academically accomplished students.

It starts with a focused, multidisciplinary first-year program taught by some of Hofstra’s most distinguished faculty members. Thereafter, Honors College students choose from a range of Honors-credit courses in all major programs as they concentrate on their majors and minors. Honors College students attend small-group seminars (20 students maximum) with experienced scholars, followed by in-depth discussions.

The program’s flexibility allows students to choose any of Hofstra’s 140 majors and to graduate in the typical time, with both a bachelor’s degree and “Honors College graduate” designation, upon completion of all Honors College requirements.

Honors College provides its close-knit student community with carefully chosen faculty mentors, who answer questions and provide academic advisement. Approximately half of Honors College students choose to live in an Honors-designated residence hall.
School of Education and Allied Human Services

Making a difference

The mission of the School of Education and Allied Human Services is to prepare professionals in education, school administration, health, counseling, exercise and athletic training, and therapeutic services.

The school’s preprofessional programs are geared toward students seeking initial teacher certification at the undergraduate or graduate level, while its professional programs are designed for students already certified and who want to pursue advanced studies within a specialized field of education.

The School of Education and Allied Human Services is based in Hagedorn Hall, whose technology-enhanced facilities include flexible learning spaces with computer-driven instructor stations and wireless communications. Rooms equipped with super-deluxe plasma screens can be subdivided for team teaching and training purposes.

Its six academic departments are: Counseling, Research, Special Education and Rehabilitation; Curriculum and Teaching; Foundations, Leadership and Policy Studies; Health Professions and Family Studies; Literacy Studies; and Physical Education and Sport Sciences.
Hofstra University has traditionally sought to serve students with different academic needs. In a world increasingly aware of differences in culture, language and learning style, the School for University Studies (SUS) extends this tradition to students with particular academic challenges. Currently the School for University Studies offers three programs: the Freshman Program, the Transfer Program and the Program for Academic Learning Skills (PALS). Please consult a separate brochure for PALS.

Both the Freshman and Transfer Programs seek to assist students through a broad assignment of personalized instructional resources. Full-time faculty members are responsible for the academic programs and for student advisement. Hofstra faculty also teach courses for the programs as needed and/or invited. SUS students make full use of all the resources of the University outside the program, including the Library, Physical Fitness Center, Recreation Center, University Tutorial Program, health services, professional counseling services, and various art, drama and communication workshops.
The best way to begin your college education

To ease the transition from high school to college, Hofstra’s First-Year Connections (FYC) brings together first-year students in small, lively learning communities. The objective is to help you make the most of freshman year, academically and socially.

The program’s average class size for both its seminars and its cluster courses is well below the 25-student average for typical Hofstra classes.

That tight-knit environment is conducive to enhanced interactivity in class as well as greater social interaction among students after class. In addition, FYC professors can provide valuable advisement about academic matters and University life in general.

FYC’s innovative interdisciplinary curriculum is an ideal introduction to the liberal arts, during which students hone skills in critical and creative thinking, discussion and writing.

Freshmen typically enroll in four to five courses during their initial Hofstra semester. The thematic approach of First-Year Connections enables students to link three of those courses.

In Connections Seminars, students work one-on-one with a faculty member on a research project in an area of interest to both. Examples of interrelated FYC Seminars include “The Literature and Mathematics of Baseball” (which also includes a trip to Yankee Stadium) and “Liberty and Equality in American Law.” For the latter, students recently worked with their professor on projects related to the two recent Supreme Court vacancies.

Examples of complementary FYC Cluster courses include “Science and Science Fiction,” which links classes in astronomy and science fiction in English and composition, and “The Great Stage,” which encompasses philosophy and drama.
Your Life outside of Class

Many residence halls are organized to suit students’ preferences. Bill of Rights Hall is an all-female residence, The Netherlands is for freshmen, while Liberty Hall and Republic Hall are for Honors College students. Each building has resident assistants in charge of helping students meet other residents and assisting them with their concerns.

Hofstra has been a member of the prestigious American Association of Botanical Gardens and Arboreta since 1985.
THE HOFSTRA CAMPUS IS AN OASIS FOR LEARNING FILLED WITH green quads, ivy-covered academic buildings, athletic fields and residence halls. Students can find comfortable park benches beneath shady trees to study, read a book or chat with friends. They can also visit a bird sanctuary on the North Campus or relax to the sound of a flowing fountain in a sensory garden behind the Spiegel Theater.

But Hofstra offers more than quiet repose. Our campus is alive with activity from the early morning to well into the night, seven days a week.

After a busy day of classes, students participate in more than 150 student groups, including 30 fraternities and sororities. Among other popular events are Career Week (including the annual Career Fair), Job and Internship Fairs, “Greek Week” activities, the Shakespeare Festival, and the Dutch Festival, with the latter’s blooming tulips adding to the springtime beauty of our arboretum.

With an annual slate of more than 500 other cultural and entertainment events, varsity athletics and more, there’s something going on virtually every evening and weekend.

Many students live on campus in one of our 37 residence halls, which offer a variety of living environments. Students can choose from suite-style or traditional-style residence halls, and all have access to Hofstra’s computer network. Campus dining offers students choices from 16 different eateries with a variety of menu choices.
Hofstra offers a wide array of sports – to play and to watch.
For athletes and sports fans alike, Hofstra offers scores of athletic events at our various stadiums and arenas, including games played by our 18 NCAA Division I men’s and women’s teams and intramural sports.

During the past five years alone, Hofstra teams have captured 15 conference championships and appeared in 17 NCAA Championship Tournaments. Our teams in men’s soccer and wrestling, and women’s soccer and softball have captured Colonial Athletic Association championships.

In any given year, Hofstra hosts about 150 intercollegiate athletic events at our many facilities – ranging from our 93,000-square-foot Hofstra University Arena (for basketball, wrestling and entertainment events) and our 15,000-seat James M. Shuart Stadium (for football and lacrosse) to our soccer stadium, baseball stadium, tennis courts and the Hofstra Swim Center, with an Olympic-sized swimming pool.

Hofstra’s Recreation Center offers facilities where you can have fun and stay in shape. Besides a multipurpose gym, there are basketball courts, an indoor track, exercise bikes, a fully equipped weight room, and a mirrored aerobics/martial arts room, as well as a lounge area and spacious locker rooms.

In addition to varsity athletics, students can participate in club sports or on intramural teams throughout the year. In fact, about 35 percent of our students participate in intramural sports.

Intramural sports for fall, organized through the Recreation Department, include flag football, outdoor soccer and basketball. For spring they include stadium soccer, volleyball and 3-on-3 basketball. Each sport averages about 15 teams. In addition, Hofstra offers eight to 10 sports clubs per semester, organized via the Recreation Department, Student Activities and the Student Government Association.
Congratulations!
You’re the newest member of an exclusive club: Hofstra alumni.
SUCCESS BREEDS SUCCESS. YOUR WELL-ROUNDED education at Hofstra will translate into living the American dream rather than merely making a living. Our reputation for turning out highly successful graduates can only help as you network with our accomplished alumni across the career spectrum.

A good deal of that connectedness is due to Hofstra's close proximity to New York City – the financial, business, media, advertising and entertainment capital of the world.

Each year nearly 500 major employers visit the Hofstra campus during two job and internship fairs as well as Career Week. In fact, recent annual surveys of the graduating class have consistently shown that 90 percent of graduates are employed within six months of earning their degrees.

Moreover, our students and alumni can call upon the resources and programs of Hofstra's Career Center as they explore, select and pursue meaningful careers. Career Center services range from individual career counseling and job-search strategies to resume critiques and videotaped “mock interviews.”

Your connection with Hofstra does not end with graduation. You will stay connected in numerous ways – through networking receptions, volunteerism and ongoing involvement in the Pride spirit clubs. Regional chapters of our alumni organizations keep the connections alive with the friends you’ve made here.

Andrew Falzon, Class of 2005, placed second in the Hearst National Broadcast News Championships. Andrew was station manager at WRHU, 88.7 FM, for two years and interviewed such politicians as U.S. Senator Hillary Rodham Clinton and New York State Attorney General Eliot Spitzer. The Hearst Journalism Awards Program is often called the “Pulitzers of College Journalism.”

HONORS COLLEGE

Entrance to Honors College is through invitation of the dean, which occurs after your acceptance to the University.
Getting Started

APPLYING TO HOFSTRA UNIVERSITY

Hofstra University seeks to enroll talented freshmen and transfer students from diverse backgrounds and locations, with varied interests. Applications are accepted for fall and spring admission.

The Admission Committee reviews each application individually to assess academic achievement, curricular rigor, leadership potential, depth of extracurricular activities, standardized test scores and overall interest in attending Hofstra University. The application process provides an opportunity for the applicant to share information that may not be apparent on a transcript or through a test score.

Questions about the application process should be directed to the Admission Office in Bernon Hall:
In writing: 100 Hofstra University
Hempstead, New York 11549-1000
By telephone: (516) 463-6700 or 1-800-HOFSTRA, ext. 610
By e-mail: Admitme@Hofstra.edu

All candidates for admission should refer to the admission application for specific instructions on how to apply.

SCHOLARSHIPS AND FINANCIAL AID

Hofstra University offers an education that will not only increase your prospects for success in your professional life or placement into top graduate programs, but also is surprisingly affordable. When students and families look beyond the costs of tuition and discover how much financial assistance Hofstra makes available, they realize that a Hofstra education may well be within their financial reach. Hofstra awarded nearly $45 million in financial assistance this year, and approximately 90 percent of Hofstra freshmen receive some type of scholarship or financial aid.

Students and parents are encouraged to work directly with Hofstra’s Office of Financial Aid. The office can provide assistance in completing the FAFSA or answering questions about available scholarships, grants, work-study programs and other types of financial assistance.

You can reach the Office of Financial Aid by calling (516) 463-8000.

This list provides basic information and is not a complete list of tuition and fees, which may vary by school.

For the full tuition and fees schedule, visit www.hofstra.edu/tuition. All tuition and fees are subject to change at any time.

Detailed information on campus security is available by accessing the Hofstra Web site at www.hofstra.edu/campussafetyreport, or the U.S. Department of Education’s Web site for campus crime statistics at http://ope.ed.gov/security, or by contacting the Advisory Committee on Campus Safety. The Advisory Committee will provide upon request all campus crime statistics as reported to the U.S. Department of Education. For additional information, please contact the Office of Public Safety at (516) 463-6606.

Hofstra University continues its commitment to extending equal opportunity to all qualified individuals without regard to race, color, religion, sex, sexual orientation, age, national or ethnic origin, physical or mental disability, marital or veteran status in the conduct and operation of its educational programs and activities, including admission and employment. This statement of nondiscrimination is in compliance with Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973 and other federal, state and local laws. The Americans with Disabilities Act compliance officer in the Plant Department (516) 463-6641 is designated by the University to coordinate its efforts to comply with Section 504. The Equal Rights and Opportunity Officer is the University's official responsible for coordinating its adherence to Title IX and other equal opportunity regulations and laws. Questions or concerns regarding Title IX or other aspects of this policy (other than Section 504) should be directed to the Equal Rights and Opportunity Officer at (516) 463-6775, c/o Office of Legal Affairs and General Counsel, 101 Hofstra University, Hempstead, NY 11549.
THE BEST WAY TO GET TO KNOW HOFSTRA IS TO visit. Meet with students such as those featured in these pages, since they can best relate their firsthand experiences – whether it’s with our small class sizes, our accessible faculty, engaging campus life, or the abundance of extracurricular activities.

And by all means, arrange to sit in on actual classes. See for yourself what a stimulating experience awaits you here.

Generations of Hofstra alumni have been attracted by our vibrant campus life and inspired by our dedicated professors. We look forward to your visit, as you consider joining our student body and becoming part of the proud Hofstra tradition.

You can participate in one of our Information Sessions and Tours or our Up Close program, which allows you to shadow a current student for a day. To arrange a visit, please call 1-800-HOFSTRA, ext. 610.

Visit www.hofstra.edu/directions for detailed directions and a printable campus map.
