

JANUARY 2003

Special Topics/Workshops - Course Descriptions

(See department listing for day, time, building and room.)

ART HISTORY -AH

AH 192 (01) CRN #10115 - MUSEUMS OF NEW YORK

This course uses the great resources of New York City in the field of art history. The course is designed as an art historical survey, but over two thirds of the meetings will take place in eleven different museums rather than the classroom, and instead of slides the class will deal with the original objects of art themselves. Starting with Egyptian and Classical Art in the Metropolitan Museum, the class will proceed to the Medieval art collections of the Cloisters, explore the old masters in the Frick Collection, and visit the Museum of Modern Art and Guggenheim Museum. Other less known, but nonetheless great institutions, such as the American Numismatic Society, Hispanic Society and New Gallery, will provide the actual materials for some of the topics the course will consider.

COMPARATIVE LITERATURE - CLL

CLL 152 (01) CRN #10116 - REFLECTIONS OF VENICE IN WORLD LITERATURE

An examination of the fascination Venice has held for many great writers over the centuries: Rousseau, Goethe, George Sand, Henry James, and Mark Twain, among others. The course will focus on the magical effect and creative inspiration Venice has had on these literary figures.

ENGLISH - ENGL

ENGL 183C (01) CRN #10307 - BASEBALL AND AMERICAN LITERATURE

Historian Jacques Barzun observed, "Whoever would understand the heart and mind of America had better learn baseball." Baseball and American Literature explores the weave of baseball's ubiquitous presence in American life from its influence on language and expression to its connection with the American persona and identity through literature from Ring Lardner to August Wilson. While maintaining a predominant literary focus, *Baseball and American Literature* also examines other forms of popular culture from songs to vaudeville to film that inform the literature.

ENGL 183S (01) CRN #10309 - VIOLENCE, SEX, CLASS CONFLICT: THE THIRTIES, THEN AND NOW

An examination of the literature, film and music of the 1930s as a reflection of the economic catastrophe that befell American capitalism in that decade as well as that decade's ripple effects well into the 1990s. The change in American attitudes to class, class conflict and property relations and effect of this change on literature, movies and music was substantial as was the reaction to these changes in the 1940s and 1950s and their reinvigoration in the 1960s and 1970s. Writers such as Henry Miller, John Fante and Charles Bukowski and film artists such as Charlie Chaplin, Preston Sturges and the Pre-Code films of the early 1930s and musicians such as Virgil Thompson, Roy Harris and Woody Guthrie will be studied.

ENGL 183Z (01) CRN #10308 - THE FANTASY OF TOLKIEN AND LEWIS

This course is a consideration of the crucial fantasy writers J.R.R. Tolkien and C.S. Lewis. The principal focus of the course is *The Lord of the Rings* in its entirety; readings also include *The Screwtape Letters* and *Perelandra*, the first book of Lewis' space trilogy. Each of these works represents important contributions to 20th century fantasy and are informed by the broad philological and literary backgrounds of their authors. The works not only represent significant acts of the imagination but are also peculiarly conservative British responses to fascism, communism, and secularism.

ENGL 184G (01) CRN #10088 - CONTEMPORARY BRITISH THEATER

Spend two-and-one-half weeks in London.

Students in this course will read, study, discuss and write about contemporary British theater, that is British drama since World War II. Among the playwrights to be studied are Samuel Beckett, John Osborne, Tom Stoppard, Harold Pinter, David Hare, Alan Ayckbourne, Peter Shaffer, Michael Frayn and Christopher Hampton. Since the course will be taught in London and classwork will be supplemented with performances of contemporary plays, along with the classics of world theater (depending on what is being staged in London at the time). Classwork will be augmented with performances at the Royal National Theatre, Royal Shakespeare Company, West End and/or fringe performances and a backstage tour of the Royal National Theatre. The course will include four theater performances. Optional theater performances will be available as well. The course will introduce students to the city of London as the literary and dramatic capital of the English-speaking world. The British library will be used as a major resource for literary research.

FINE ARTS - FA

FA 106 (01) CRN #10257 - SPECIAL PROJECTS

Discover graphic design while studying in London! Study contemporary design and the western design tradition as it specifically reveals itself in Great Britain through selected readings, visits to museum collections and design studios, talks by invited lecturers, and discussion. Two visual design projects will be assigned. Experience, observe and record the output of Britain's traditional, vernacular and cutting-edge contemporary design in the course of exploration of the lively city of London. For information about the cost and travel arrangements, call Professor Ocko at (516) 463-5422. (Please note: AH 152 Venetian Art & Architecture is offered through the RLL Department.)

HISTORY - HIST

HIST 177 (01) CRN #10006 - WAR AND PEACE IN THE NUCLEAR AGE

This course looks at the history of the cold war up to the present moment through a combination of readings, discussions and video. Topics covered include Atomic Diplomacy, Nuclear Proliferation, The Economics of Military Spending, The Global Arms Trade, Regional Conflicts in the 1990s and Collective Security and Disarmament.

JANUARY 2003

Special Topics/Workshops - Course Descriptions

(See department listing for day, time, building and room.)

HIST 178 (01) CRN #10295 – THE PRESENT IN PERSPECTIVE: THE IMPACT OF DELIBERATIVE DEMOCRACY AND LEADERSHIP IN AMERICAN SOCIETY

Examining current issues in historical perspective (e.g. race, ethnic tensions, America's role in the world, alcohol abuse, drugs, censorship, civil liberties, aging, health care and terrorism). This course will focus on the roles of citizens and leaders in reaching deliberative judgments regarding public policy (past and present). Students who take this course will have an opportunity, if they wish, to be part of a leadership project at Hofstra during the Spring 2003 term.

HUMANITIES - HUM

HUM 234 (01) CRN #10299 – MUSEUMS OF NEW YORK

This course uses the great resources of New York City in the field of art history. The course is designed as an art historical survey, but over two thirds of the meetings will take place in eleven different museums rather than the classroom, and instead of slides the class will deal with the original objects of art themselves. Starting with Egyptian and Classical Art in the Metropolitan Museum, the class will proceed to the Medieval art collections of the Cloisters, explore the old masters in the Frick Collection, and visit the Museum of Modern Art and Guggenheim Museum. Other less known, but nonetheless great institutions, such as the American Numismatic Society, Hispanic Society and New Gallery, will provide the actual materials for some of the topics the course will consider.

LITERACY STUDIES – LYST

LYST 280E (A) CRN #10105 – LANGUAGE, DISCOURSE, AND CINEMA

This course explores the visual techniques of cinematography – the “language” of film – in order to examine how film conveys meaning, as well as how this expressive system has become one of the most rapidly evolving forms of symbolic communication. This sort of knowledge-base is prerequisite to any deeper exploration of specific aspects of cinema, such as the second focus of the course, which is to consider the language *within* film by examining a selection of English-language motion pictures for linguistic insights about the relationship between language, culture, and identity. Course culminates in an exploration of the pedagogical implications of these linguistic/cinematic insights on language and literacy instruction in American schools.

POLITICAL SCIENCE - PSC

PSC 192 (01) CRN #10113 – U.S. IN THE UNITED NATIONS

This course will hold its initial meeting at Barnard 101 at 12 noon on January 2, 2003. All other meetings will be held in Manhattan, at or near the United Nations complex. Students are responsible for their own transportation, and are expected to dress appropriately for meetings with professional diplomats and UN staff (jackets and ties for men, equivalent for women). Sessions will be scheduled from approximately 10 a.m. through 1 p.m. each day. Please contact Professor Green at (516) 463-5617 or email: pscdmg@hofstra.edu for further information.

SPEECH – SPCH

SPCH 263A (A) CRN #10067 – AUGMENTATIVE COMMUNICATION

This course will enable students to develop an understanding of the primary issues in augmentative and alternative communication (AAC). Various techniques, devices, systems and training strategies will be introduced. Students will acquire knowledge of the population of AAC users, parameters of an AAC evaluation, and funding. Classes will meet January 2, 7, 9, 14 and 16.

SPCH 263I (A) CRN #10110 – EARLY IDENTIFICATION

This course will explore the responsibilities of the Speech/Language Pathologist working with children enrolled in New York State's Early Intervention program. The course will cover the identification, referral, diagnostic and treatment protocols mandated by New York State. Documentation procedures will also be addressed in this course. Classes will meet January 21, 22 and 23.

SPCH 263R (A) CRN #10050 – SEMINAR IN MEDICAL SPEECH PATHOLOGY

This course will familiarize students with terminology, procedures, and protocols used in medical settings. The role of the speech-language pathologist when working with medically compromised individuals will be explored. Topics include: current health care directives, tracheotomy, medical ventilation, pharmacology, and the continuum of medical care. Classes will meet January 6, 8, 13 and 15.

SPRING 2003

Special Topics/Workshops - Course Descriptions

(See department listing for day, time, building and room.)

ANTHROPOLOGY – ANTH

ANTH 188 (A) CRN #22966: NATIVE CULTURES OF THE AMERICAN SOUTHWEST

An exploration of the archaeological background and cultural adaptations of the Native People of the American Southwest. The groups to be covered are the Pueblo people (Hopi, Zuni, and others) and the non-Pueblo groups (Navajo, Apache, and others) with a focus on their past and present interactions.

During Spring Break there will be an optional trip to the Southwest to explore first hand some of the archaeological sites (Chaco Canyon, Canyon de Chelly) and the Navajo, Hopi and Zuni Reservations. (For further details on costs, contact Professor Buddenhagen, Ext.3-5230.)

AUDIO VIDEO FILM – AVF

AVF 187B (01) CRN# 24810: WRITING FILM CRITICISM

Writing film criticism is an operation of one art form (the critical or analytical essay) on another (film). But since movies are so complex, how does one zero in on what's important about them? What are the available styles one can use to write about film? How does one sort out the various (and variable) contributions of collaborative filmmaking: those of director, producer, writer, actors and set designers? How does one express doubts and mixed feelings about a picture one admires? How does one responsibly attack the meretricious and exploitative? How does one distinguish between the entertaining vitality of a manipulative pop culture package and the harder integrity and challenge of film art (and what does one do when they seem hopelessly entangled)?

To prepare to confront these questions we will be reading representative examples from a number of important film critics, such as Manny Farber, Pauline Kael, Andrew Sarris, Parker Tyler, Robert Warshow, and Otis Ferguson. To attempt to answer the questions, students will be required to review new releases, reconsider old favorites, write about the career of a director or performer, and analyze the styles and methods of critics read and discussed in the course. In addition, students must read newspaper and magazine reviews and critique them in class. (Same as ENGL 190N)

Admission to class by permission of Film Coordinator.

BUSINESS COMPUTER INFORMATION SYSTEMS - BCIS

BCIS 010 (DI) CRN #24141 – INTRODUCTION TO COMPUTERS IN BUSINESS

*Note: This is a distance-learning course. See the Hofstra University Bulletin for the regular course description. Prerequisite: BCIS 009. School of Business students may not take this course unless they have prior credit for BCIS 009. Students who need to take both BCIS 009 and 010 must take BCIS 014 instead. Credit will not be given for both BCIS 010 and 014.

This course will cover all the concepts and material common to all BCIS 010 courses: The difference is that interactions between faculty and students will be conducted primarily over the Internet. There will be one introductory on-campus session during the first week of classes to explain the resources that will be used and how to access them. Weekly assignments will be given which can be submitted over the Internet. There will be a cyber-class site where all class materials beyond tests and required CDs will be posted. This material, combined with assigned readings and CD-based hands-on work will serve as the class content.

In order to work off campus, students will need a PC (Pentium II or higher, 32+ MB RAM, CD drive, 33K modem or higher). In addition, they will need access to the Internet via and Internet service provider. Those students who do not have the requisite hardware or software can use the Hofstra facilities to complete assignments.

All exams and homework assignments will be delivered via e-mail except for the final exam. The final exam must be taken in a proctored environment, either at Hofstra or at a site and time mutually agreed upon by the student and the instructor.

BCIS 157F (01) CRN #25593 – ROUTING AND SWITCHING TECHNOLOGY

Prerequisite: BCIS 120, junior class standing or above, and permission of the department chairperson.

This course will provide students with the necessary knowledge relating to Cisco small and mid-range enterprise networking routers and switches. Gaining knowledge will allow students to plan, design, and implement from the ground-up, real-world physical as well as logical network solutions utilizing common standards defined by ANSI, EIA/TIA, ISO, and IEEE.

Content of this course involves the OSI bottom layer structure and the physical connectivity devices that operate at that layer, the layer 2, 3, 4 specifications and protocols, and the Cisco equipment that operate at each of these layers, and a wide integration of this equipment to create working solutions that meet specific needs for enterprise networking. This course will be offered in the Zarb School Network Instructional Lab.

BCIS 257C (A) CRN #25592 – INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Prerequisite: BCIS 205 and permission of department chairperson.

A course in Information Technology Project Management from the perspective of management of successful Information Technology Projects. The course will use a combination of text, cases, and software to give the student an understandable, integrated view of the many concepts, skills, tools, and techniques involved in Information Technology Project Management.

BIOLOGY – BIO

BIO 190 (01) CRN #24910 – BIOINFORMATICS

An introduction and overview of bioinformatics will be provided through lecture and hands-on exercises. Students will explore fundamental applications of publicly available DNA and protein databases, computational biology tools and the underlying mathematical principles.

One hour lecture, two hours lab. Prerequisites: BIO 135, 137

BIO 253A (01) CRN #23630 - BIOINFORMATICS

Methods for studying nucleic acid and protein sequence data will be explored in this introduction to bioinformatics. Applications and underlying computational foundations of the following topics will be explored through hands-on exercises: sequence assembly and alignment, database searching, gene finding, mining of public databases, gene feature prediction, protein structure and folding representation, phylogenetics, and expression analyses. One hour lecture, two hours lab. Prerequisites: BIO 135, 137

SPRING 2003

Special Topics/Workshops - Course Descriptions

(See department listing for day, time, building and room.)

COMPARATIVE LITERATURE AND LANGUAGES – CLL

CLL 151 (01) CRN# 23621: ROBOT DREAMS: ARTIFICIAL AND HUMAN IDENTITIES IN LITERATURE AND POPULAR CULTURE
In this course we will trace the issues of mechanization and artificial intelligence in literature, and film from the industrial revolution through the age of the Internet. What is the proper response to the possibility of “dehumanization” by machines? In attempting to answer this question, writers often find themselves asking what is really human, and how the natural can be effectively distinguished from the manufactured. We will discuss both the resistance to technology and the often difficult embrace of it, reading authors such as Mary Shelley, E.T.A. Hoffman, Karel Capek, Jules Verne, Franz Kafka, and Stanislaw Lem. Films will include *Metropolis*, *Blade Runner*, *The Matrix*, and *A.I.*

COUNSELING – COUN

COUN 284A (A) CRN #25591: TECHNOLOGY FOR COUNSELORS
This course is designed to provide counselors and helping professionals with basic knowledge and skills related to the use of computer technology as a tool for research, analysis, and application in counseling. Topics will include computer technology literacy, navigating, using and evaluating the Internet and Websites, electronic-mail, chat sessions, electronic networking/mentoring, presentations, bulletin boards, online professional journals, electronic newsletters, newsgroups, on-line courses, spreadsheets, databases, as well as viewing and evaluating guidance applications/software used for career and college searches and student management in schools. Discussions on the ethical and legal issues related to the use of technology in educational and human services as well as to its limitations will be included. With the goal of fostering technical skills and awareness, this course will combine practical experiences using computers, discussions of current issues in the field of educational computer technology, and analysis of the applications created for the counseling profession.

ENGLISH – ENGL

ENGL 182W (01) CRN #25319 – LITERATURE AND POP MUSIC
This course will explore how the folk tradition influenced the romantic poets and American popular music; how the great lyricists of the jazz age engage with and in some ways become part of the literary tradition; and, finally, how literature and popular music collide and combine in the work of various modern singers and songwriters. We will read and listen to folk and popular lyrics for their art and craft as well as for what they tell us about the cultures in which they were born.

ENGL 182X (01) CRN #25322 – SCIENCE FICTION

This course will explore the way creative writers incorporate science into their stories so that science and technology become integral parts of a work of art. Until recently, science fiction has been regarded as something less than literature. Does the central role of technology in a story make it fundamentally different from literature in which science and technology remain in the background? In examining the relationship between science and literature, we will survey some of the most creative stories ever written, including works by Edgar Allan Poe, Jules Verne, Santiago Ramon y Cajal, Isaac Asimov, Phillip K. Dick, William Gibson, and Stanislaw Lem. We will also analyze some classic science fiction films and television episodes, including *Star Trek*, but the main emphasis will be on written texts. One shorter

paper and one longer (six-eight pages) paper and weekly one-page reading responses will be required.

ENGL 183I (9A) CRN#25318 – BRITISH LITERATURE AND CULTURE: THE SWINGING SIXTIES

In this course we will explore the literature and culture of the now-mythical “Swinging Sixties” England. In doing so, we will read the literature of the period within the historical context of Britain’s loss of its once extensive empire, and within the cultural context of the so-called “Permissive Society” legislations that liberalized social and sexual mores, the coming of age of the first wave of the British “Baby Boom”, and, consequently, the popular culture (music, fashion, film, etc.). We will read works by such authors as Colin MacInnes, John Osborne, Elizabeth Bowen, Muriel Spark, Joe Orton, Beryl Bainbridge, Hanif Kureishi, Angela Carter, and John Lennon, and, periodically, I will provide some interesting surprises. Requirements include midterm and final exams, and a research paper—not to mention an open mind, as this class is rated R for sexual content, language, and “adult situations.”

ENGL 184U (01) CRN #25317 – LITERATURE OF THE GILDED AGE: 1860-1900

Between 1860 and 1900, America transformed itself from a thinly-populated, provincial and peripheral place to a complex society with large cities and fortunes: the richest and most powerful nation on earth. To a large degree, it became the country we know today. Mark Twain called this period “The Gilded Age” because of its booming and ostentatious prosperity. In this dynamic period, American writers dealt with such issues as increasing urbanization, the aftermath of the Civil War, the spread of commercial and industrial culture, social justice, the rights of women, the identity of America in the world, the problem of maintaining individuality in a culture that demands conformity, the problem of living a rich inner life in a culture obsessed with material things, and the problem of living a moral life in a culture obsessed with money and status. As they considered these issues, they wrote some of the most exciting, shocking, absorbing, and funny literature Americans have ever written. We will read works by Whitman, Dickinson, Twain, James, Howells, Crane, Chopin, Gilman, and Wharton. Requirements will include two papers, a journal, and class participation.

ENGL 190I (01) CRN #25334 – ADVANCED PROSE WRITING: THE ART OF REVISION

In this advanced fiction workshop we will explore every aspect of revision from the sentence to the entire story, from structure to our ideas of where stories come from. It is through the process of revision that a writer discovers the craft and art of storytelling. Through revision ideas, images, words even are allowed to develop and to become precise. The semester will begin with careful analytical readings of Flannery O’Connor’s “Geranium” and “Judgment Day”, the latter a revision of the former, written respectively at the beginning and end of her career. Revision (Re-Vision): How do the two stories differ, what are her concerns, how are the different approaches to the material described, how has she grown? We will also examine E Scott Fitzgerald’s “Trimalchio” and “The Great Gatsby,” the former a first draft of the latter. These studies will be guides to take back to the revision process which in turn will teach students where the beauty (and art and fun) of writing truly lies. We will workshop one story per student through several revisions.

SPRING 2003

Special Topics/Workshops - Course Descriptions

(See department listing for day, time, building and room.)

ENGL 190P (01) CRN #25321 – ADVANCED WORKSHOP: THE CRAFT OF POETRY: RHYTHM AND FORM

What gives vitality and character to a line, to a stanza, to a poem? In this workshop we will study the elementary patterns that create rhythm, which is inseparable from meaning and feeling, i.e., the emotional/intellectual experience of reading or writing a poem. We will experiment with the many different kinds of poetic meter available to anyone writing in English (including alliterative verse, accentual verse, syllabic verse, and blank verse), and will also look closely at some of the formal and rhetorical properties of free verse. While this is a creative writing workshop it is also recommended for English majors interested in a hands-on approach to the study of poetry. For Creative Writing majors, this is an advanced creative writing workshop. Prerequisites: English 133 and/or 134 or permission of instructor.

ENGL 197W (01) CRN #25335 – ADVANCED PROSE: NARRATIVE VOICE

A writing workshop concentrating on narrative skills, with the goal of enhancing the writer's ability to develop an appropriate and unique narrative voice that will move the story line along in a lively way and at the same time economically express thematic intention. Selected readings. Presupposes the student has taken English 133 and 135 (or English 134 with the instructor's permission.)

ENGL 197Z (01) CRN #25320 – ADVANCED PLAYWRITING

Dramatic Image – A Playwriting Workshop

What makes an image necessarily dramatic? How might working from such an image support the development of a dramatic idea? In this playwriting workshop we will explore the ways in which image and metaphor contribute to our deeper appreciation of dramatic techniques. Incorporating a selection of published one-act and full-length plays, among other resources, we will determine how, as playwrights, our own set of dramatic images might coax an insistent idea into a structured, theatrical shape. Students will be responsible for brief writing assignments, as well as a final project consisting of either a full-length one-act play or a draft of an extended (two-act) full-length project. All work will be read and discussed during drafting stages in an informal but comprehensive workshop. Please note that this is a more advanced playwriting course and represents an extension of English 198A or other introductory playwriting workshops. Prerequisite: either ENGL. 198A or ENGL. 197X, or permission of the instructor.

ENGL 198K (9A) CRN #25336 – ADVANCED EXPOSITORY PROSE

Through a variety of reading and writing assignments, this course enables students to strengthen already competent prose skills, to develop voice and style, and to increase overall fluency in the language. By integrating drafting and revision into the process of composition, students learn to write with greater concision and precision, to organize material more sensibly, and to move more effectively through exposition, analysis, and argument. Class members may come from a variety of disciplines; thus, within broadly conceived topics and assignments, students are encouraged to pursue problems and questions of their own choosing. Because revision is essential to this course, final grades are determined largely by the portfolio of revised work submitted at the end of the term. The advanced level of English 198K may be said to target juniors and seniors; however, interested

(and qualified) lower division students are encouraged to speak with the instructor. Prerequisites: Successful completion of English 1,2, and the Proficiency Examination; approval of the instructor.

FINANCE – FIN

FIN 157A (01) CRN #25619 – FINANCIAL STRATEGIES FOR REAL ESTATE INVESTMENT

The purpose of this course is to prepare students to design and to analyze financial structures for investment in real estate. In this light, the following topics are considered: Debt financing strategies for Real Estate including partially-amortized mortgages, wraparound mortgages, and mortgage participations; Equity financing vehicles including Real Estate Partnerships, Master LPs, and Real Estate Investment Trusts; Structured Financing arrangements in Real Estate including Commercial Mortgage-Backed Securities, Convertible Mortgages, and Convertible Equities; Financial leases, lease-financed construction, and sale-leaseback arrangements. The analysis of publicly traded real estate investments is also considered, including Mortgage-Backed Securities and their derivatives. Issues of domestic and international portfolio diversification are examined.

HISTORY - HIST

HIST 008A (A) CRN #24300 - MORE THAN A GAME: THE CULTURAL & POLITICAL HISTORY OF SOCCER

Soccer is the world's most popular sport. In countries outside the United States, the sport arouses collective passions that are matched by nothing short of war. This course will explore the rich history of this cultural phenomenon in the twentieth century. Among the topics to be explored: hooliganism, gender dimensions, nationalism, the political economy of soccer, and the aesthetics of public performance.

HIST 177 (01) CRN #21625 - THE PRESENT IN PERSPECTIVE: THE IMPACT OF DELIBERATIVE DEMOCRACY AND LEADERSHIP IN AMERICAN SOCIETY

Examining current issues in historical perspective (e.g., race, ethnic tensions, America's role in the world, alcohol abuse, drugs, censorship, civil liberties, aging, health care, terrorism), this course will focus on the roles of citizens and leaders in reaching deliberative judgments regarding public policy (past and present). Students who take this course will have an opportunity, if they choose, to be part of a leadership project at Hofstra during the Spring 2003 term.

HIST 177 (02) CRN #24310 – HAPPY HOLIDAYS: THE HISTORY OF THANKSGIVING, CHRISTMAS, AND NEW YEARS

This course will offer an examination of the historical background and development of these holidays. Much of what we celebrate in these holidays is the result of centuries of accretions and has little to do with the historical reality. We will investigate such topics as: What was eaten on that first Thanksgiving?, Where did Santa Claus come from?, and Why does the new year begin when it does?

HIST 177 (A) CRN #24320 - FRANCE: REVOLUTION AND SOCIAL CHANGE

This course will cover the period 1598-1870—from the Fronde to the Paris Commune. It will embody a topical examination of France's many revolts and revolutions against the dominant political and social orders from the establishment of the Old Regime. The central question of the course will be: Why has the nation's development been so exceptionally contested and violent? The answer, this course will

SPRING 2003

Special Topics/Workshops - Course Descriptions

(See department listing for day, time, building and room.)

advance, can only be found in a comparative approach to the history of rebellion. Some attention will be given to the influences of France's revolutionary tradition and history of social and political protest to the development of modern France.

HIST 177 (B) CRN #25613 - PUBLIC POLICY, PROTEST, AND REFORM

Historical perspectives on the roles of citizens in shaping public policy and in advancing democratic principles and practices. Protest, reform and the uses of power during the past century will be a central focus of this course. Students in this course may elect to learn facilitator skills associated with the National Issues Forums, as they research and analyze selected current issues in broader historical contexts.

HIST 177 (C) CRN #24321 - WAR AND PEACE IN MODERN AFRICA: A HISTORICAL PERSPECTIVE

In this course we examine major political conflicts in Africa from a historical perspective, using events in Kenya, Nigeria, and Angola as case studies. We pay particular attention to the long-term effects of conflicts and the extent to which they have solved political disputes. We explore these issues in the context of a changing global, economic, and political environment, particularly the collapse of European empires in Africa, the process of the state formation, and the Cold War.

HIST 178 (01) CRN #23067 - AMERICAN LEGAL HISTORY

An introduction to American law which examines the interaction of the legal system with the nation's economy and society from the late eighteenth century to the present day. Course objectives include the discovery of how law helped to shape and channel change in society, and how law—especially judge-made, private law, in both federal and state courts—was in its turn influenced by the demands of a growing and developing nation.

HIST 178 (A) CRN #22133 - COMPARATIVE LABOR HISTORY

Focusing on the Age of Industry (ca. 1750 to the present), this course compares labor's changing form, structure, and organization in Western Europe and the United States. Among the sources to be studied will be several memoirs in an attempt to understand the problem of labor from the bottom up.

HIST 182 (9B) CRN #24312 - SPAIN AND AFRICA

"Africa begins at the Pyrenees," the novelist Alexander Dumas once said, echoing an old sentiment that Spain belongs not with Europe but with the vast continent to the south. This course examines the long, turbulent, but often creative relationship between Spain and Africa, beginning with the Islamic occupation of 711. Students will learn about the great medieval empires of Mali, Morocco and Mauritania, the gold route across the Sahara, and the communities of culture linking Muslim Granada with Tunisia and Cairo. We will discuss Jewish experiences in North Africa, and the history of Spanish colonialism on the so-called "dark continent," including the little-known tale of Equatorial Guinea. Other topics are the savage Army of Africa, once led by General Franco; Pablo Picasso's inspirations in African art; and the perspectives of Africans living in Spain today. This course may be counted towards the cross-cultural requirements for History majors, but is not a Cross-Cultural CORE course.

HIST 183 (A) CRN #24313 - TWENTIETH-CENTURY FRANCE

This seminar on modern France will focus on the period 1890 to the present. Students will analyze scholarly works, films, translated eyewitness accounts, memoirs, novels, and other primary materials in order to complete a major research paper on a topic of their choice. We will examine France's bitter and often fratricidal politics, bred of an "unresolved" revolutionary legacy; its experience of the great trauma of modernization in social, economic, and cultural life, as the nation struggled to reconcile modern forces with a rootedness in a variety of powerful traditions. We will follow France's place in the world from imperial world power to post-colonial power of declining global significance with the "world" increasingly (and to some disturbingly) present within its borders. Papers will be presented in draft form to other members of the seminar, who will respond with oral and written comments and suggestions. Several films will be screened in class, such as *The Marseillaise* (Renoir, 1938), *The Rules of the Game* (Renoir, 1939), and *The Sorrow and the Pity* (Ophuls, 1971).

HIST 184 (A) CRN #25614 - THOMAS JEFFERSON

This semester's seminar will investigate the public and private lives of Thomas Jefferson. Topics will include: Jefferson's role as a revolutionary governor of Virginia, his authorship of the Declaration of Independence, his views on slavery and the Sally Hemmings controversy, his role in the formation of an opposition to President Washington and the crisis of 1800, and his relations with such other prominent Americans as Hamilton, Adams, and Burr. Extensive reading in primary as well as secondary sources, class discussion, and a final research paper.

HIST 292 (A) CRN #24323 - URBAN POLITICS AND POWER: THE QUEST FOR MINORITY SOCIAL EQUALITY AND POLITICAL REPRESENTATION IN TWENTIETH-CENTURY AMERICA

At the turn of the twentieth century, W.E.B. DuBois warned that the most explosive problems of the next 100 years would be related to issues of race in the United States. As the past century unfolded and race-relations topics dominated newspaper headlines, it became apparent that his prediction was correct. In this seminar students will explore aspects of race and politics in twentieth-century America and conduct primary research in relation to the topic of their choice. Topics might include such diverse aspects of urban politics as education policy, minority group relations, racial segregation, racial discrimination, racial profiling, minority group coalition building, social and political protest, radical organizations, race riots, political reapportionment, electoral politics (local, state, and/or national), presidential policy, etc.

HONORS COLLEGE - HUHC

HUHC 020A (H1) CRN #25070 - VISUAL LITERACY

The world around us presents us with a complex and never ending barrage of visual stimuli, both human-made and otherwise, especially in this era of photography, film, video, and the Internet, and perhaps most insistently through advertising. In fact, research has substantiated that visual imagery in large part governs our very thought processes. Yet in direct contrast to verbal literacy, which is carefully taught and nurtured, our culture devoted must less priority to fostering what might be termed "visual literacy." Through readings and exercises in detailed analysis of various aspects of our visual

SPRING 2003

Special Topics/Workshops - Course Descriptions

(See department listing for day, time, building and room.)

experience, the aim of this seminar will be to develop awareness of the many subtle ways in which visual language communicates, and the rich variety of concerns that inform the meanings of the visual culture that surrounds us.

HUHC 020B (H1) CRN #25071 – SPECIAL STUDY ON INFORMATION TECHNOLOGY IN THE 21ST CENTURY

This seminar covers the basic physical and mathematical principles that explain the operations of modern technologies, such as bar-code scanners, auto-focus cameras, modems, fax machines, compact discs and players, audio processing, image processing and protocols, telephone and cellular phones, satellites, standard and high-definition televisions, Internet and World Wide Web hypertext markup language and Web page building, and fiber-optic devices and systems. It is designed for both science and non-science honors students and aims to provide an understanding of the development and basic engineering principles of modern information technology and the operations of commonplace information systems. Students are invited to be engineers for one semester – to think quantitatively and to understand the principles and operations of various commonplace electronic-based information systems. It attempts to teach technology in the least stressful manner without complicated mathematics. No prerequisites or previous engineering experiences are required.

HUHC 020C (H1) CRN #25072 – FOUNDATIONS OF DISBELIEF

The existence of God, the revealed truth of a sacred text, the importance of faith, have been central beliefs for vast numbers of people—all over the world, and for at least as long as humans have recorded their thoughts. Even in our technological, materialistic modern age polls show up to 93% of people still confess a belief in God (however properly qualified.) However, despite the overwhelming popular support for a religious world view there has always been a subset of dissenters—those who questioned the validity of particular religious beliefs or even raised doubts as to the very existence of God(s). This position has not fared as well in the competition for the minds of humankind. Even so, it does persist. In fact it is probably more robust today than at any other time in history (despite remaining a distinctly minority position.) In this course we are going to examine the foundations of this position of religious skepticism. Why do these individuals not recognize what the majority see as the Truth? Why do they not accept evidence that seems so compelling to the greater part of humankind? The course is structured to allow us to understand the criticisms brought by religious skeptics against traditional arguments for belief. We will consider, in turn, the authority of Scripture, philosophical arguments and the evidence of Nature as bases for belief and the skeptical grounds for questioning those positions. Then we will allow the critics of religion to offer their explanations of the ubiquity of religious belief. By doing so we hopefully will gain some insight into the mind of the religious skeptic, and perhaps shed some light on the state of religious belief in the modern world. These topics will be evaluated critically, with no required presumption of the truth or falsity of any of the claims. Students, however, must be willing to discuss these issues in a rational, critical manner.

HUHC 020D (H1) CRN #25073 – THE HUMAN GENOME

This course is designed for non-biology majors and seeks to teach students the genetics that is presumably of most interest to them: human genetics. The first three weeks will focus on genetic principles

presented from a historical point of view. This approach is used for two reasons: it will stress the conceptual basis of the material (How did Mendel figure out what all those ratios meant?) as well as make the material more interesting from a human point of view (How dare Fisher challenge Mendel!). The genetic basis of behavior is being considered using sexual orientation as an example; mankind's response to our understanding that certain behaviors are genetically predisposed will next be explored when we discuss numerous eugenic movements. Meetings six through eight are concerned with the genetic basis of disease and it is hoped that you will begin to appreciate the complexities of how genes govern our health. The remainder of the meetings will focus on gene cloning and its implications in terms of medicine, politics, morality, and the lives to come.

HUHC 020E (H1) CRN #25074 – THE CHINESE NOVEL: *THE DREAM OF THE RED CHAMBER*

This course explores the intellectual life and cultural values of traditional China through the medium of a 120-chapter (five-volume) novel known variously as *The Dream of the Red Chamber* or *Story of Stone*. Conceived and substantially completed by Cao Xuequin (c. 1724-64), the novel is considered the greatest masterpiece of traditional Chinese fiction. *The Dream's* comprehensive scope includes characters of almost every profession: maids-in-waiting, stewards, gardeners, cooks, nuns, actors, officials, members of imperial family, gamblers, pirates, prostitutes, etc. It is a mine of information of the basic values of Confucianism, Buddhism and Taoism, thus laying out a philosophical foundation and framework for the discussion of the novel.

LINGUISTICS – LING

LING 181 (01) CRN #23675 – LANGUAGE AND LAW

It is standard for medical evidence in a case to be examined and analyzed by medical experts. Language evidence – confessions, testimony, contracts, tape recordings of conversations, etc. – is similarly analyzable by linguists, experts on language. Using case studies, this course looks at the way people use language to lie, cheat, and deceive as well as to tell the truth, admit responsibility, and to confess. Includes analysis of police interrogations, constitutional rights, and the problem of what contracts mean to the different parties who sign them.

LITERACY STUDIES – LYST

LYST 281C (A) CRN #25627 – CULTURAL AND HISTORICAL PERSPECTIVES

In this doctoral seminar students will study literacy through the exploration of the theories of Bahktin, Vygotsky, and Dewey. They will then consider the theoretical perspectives that they have developed in light of the work of more recent scholars such as Gee and Street who approach literacy and language use from a sociocultural perspective.

MATHEMATICS – MATH

MATH 2980 (A) CRN #25081: ADVANCED FINITE MATHEMATICS

Theory of finite mathematical models arising in combinations, design of experiments, game theory, graph theory and probability. Applications to selected problems in computer science, business, and the social and natural sciences. Students will be encouraged to pursue applications related to their specific interests.

SPRING 2003

Special Topics/Workshops - Course Descriptions

(See department listing for day, time, building and room.)

MATH 299N (01) CRN #25082: ADVANCED TOPICS IN NUMBER THEORY

Elementary number theory: prime numbers, congruencies, prime numbers. Diophantine equations, quadratic reciprocity, and algebraic number fields.

PHYSICAL EDUCATION AND SPORT SCIENCES - PESP

PESP 185F (01) CRN #22794 – KICKBOXING

Students will improve their health-related fitness by learning various movement techniques involving kicking, punching, and blocking.

PHILOSOPHY – PHI

PHI 181 (01) CRN #25108 – PHILOSOPHY OF QUANTUM MECHANICS

Quantum Mechanics is the most fascinating and puzzling physical theory of our time. We still don't fully understand what it tells us about the nature of basic elements of reality, yet it is by far the most successful theory in physics we have ever come up with. Einstein thought it had to be false, saying that, "God does not play dice with the universe." Einstein (with Podolsky and Rosen) designed an experiment to show what is wrong with it. Thirty years later J.Bell has shown that Einstein's analysis is wrong and if Quantum Mechanics is empirically correct, the world does behave in a rather peculiar way. This course is meant to introduce you to the theory in a non-technical way. We will dedicate a lot of time to the fundamental problem with the theory as it is typically understood – the measurement problem – and discuss several solutions that have been proposed during the last 50 years.

This course does not require any background in mathematics.

PHI 182 (01) CRN #24102 – SELECTED PHILOSOPHERS: PLATO

In this class, we will examine a selection of the dialogues of Plato, including the *Euthyphro*, *Meno*, *Phaedo*, *Republic*, *Theatetus*, and *Symposium*. We will focus on the such issues as: the theory of Forms, the doctrine of recollection, the immortality of the soul, the value of justice, and love. Prerequisite: PHI 10 or the permission of the instructor.

POLITICAL SCIENCE – PSC

PSC 154 (01) CRN# 23863: SEMINAR ON NATIONALISM

An upper-level seminar that will examine the significance of nationalism in the nineteenth and twentieth centuries, as well as today. The focus will be upon specific examples of nationalism, and will also look at contemporary sub-national movements. This course will give students an opportunity to study in depth some major works on nationalism, including those of Anthony Smith, Ernest Gellner, and Benedict Anderson. It is highly recommended that students have taken at least one other course in the political science department or upper-level courses in the social sciences.

RELIGION – RELI

RELI 140 (01) CRN #21752 – SEMINAR IN RELIGION: WOMEN IN EARLY CHRISTIANITY

This course examines the representations of women in the first four centuries of Christian history. During this time, orthodox Christianity struggled to distinguish itself not only from Judaism and paganism, but also from competing sects of Christianity. The course situates Christian portrayals of women within particular social milieus (the Greco-Roman World, orthodoxy and heresy, martyrdom and asceticism) in order to determine the ways in which the roles and representations of women contributed to the spread of Christianity and to its self-definition.

SOCIOLOGY – SOC

SOC 191 (01) CRN #21943 – SOCIOLOGY OF VIOLENCE AGAINST WOMEN

Violence against women occurs in many forms. This course will examine the different sociological perspectives on violence, with a special emphasis on domestic violence. We will explore the different manifestations of violence against women from historical, cultural, and contemporary perspectives. Mechanisms of institutionalized control and institutional responses, particularly in the United States, will be addressed. Throughout the course we will draw upon women's individual and collective strategies to end violence in the local, national, and global contexts.

SOC 191 (A) CRN #21942 – SOCIAL MOVEMENTS

As Tiananmen Square and the Battle of Seattle illustrate, people throughout the world voice their options by taking to the streets. This course examines how individuals come to participate in social movements; the timing of movements; the goals and forms of collective action; state and media responses to protest; and the consequences of insurgency. Drawing upon several case studies, we will explore the organizational, structural, cultural, and transnational dimensions of movements. Students will have an opportunity to use concepts discussed in class by observing local organizations pursuing social change.

NOTES

NOTES

AVAILABILITY OF RECORDS

TO PARENTS AND STUDENTS

The University complies with all provisions of Public Law 93-380 (Privacy Rights of Parents and Students—disclosure law.) Students may make an appointment in the Office of Academic Advisement to inspect any record included in the terms of the law.

TO OTHERS

In compliance with the Family Education Rights and Privacy Act (Buckley Amendment), this statement reflects Hofstra University's policy.

The following information may be released by telephone: student's dates of attendance, date of graduation, and degree earned. Other kinds of directory information, such as a student's address, telephone listing, major field of study, awards received, and the most recent previous education agency or previous institution attended, will be released only in response to a written request. Hofstra reserves the right to refuse the above information if the reason for the request is not considered to be a sufficient need to know.

Information regarding the student's record, including grades, courses, GPA, social security number, and other personal information will not be released without the student's written consent.

SOLOMON AMENDMENT

In accordance with the Solomon Amendment, the University will make accessible to the Secretary of Defense, directory information, including each student's name, address, telephone listing, date and place of birth, level of education, academic major, degree(s) received, and the educational institution in which the student was most recently enrolled. However, the University will not provide direct information for specific students who formally request that such information be withheld from third parties.

HOFSTRA UNIVERSITY
