

IPAD Apps for Students with Disabilities

1. Reading:

<http://www.voicedream.com>

The Voice Dream app will help you read anything including books from Bookshare with 78 built in voices highlight as you read capability.

2. Low Vision:

<http://visionassist.slinkyware.com>

The Vision Assist app magnifies text and images with the ability to change contrast.

3. Note-taking:

<http://luminantsoftware.com/iphone/audionote.html>

The AudioNote app will combine audio recording of lectures with text or handwritten notes. During playback, your notes and images will also be highlighted.

4. Executive Functioning and Organization:

<http://www.appfluence.com>

The Priority Matrix app helps with task management and prioritizing daily goals. Once inputted, you can access your information without internet access!

5. Stress Management and Relaxation:

<http://fabiensanglard.net>

The Fluid 2 app is a wonderful stress relief and relaxation tool that has also been reviewed as helping students with ADHD in the classroom.

6. Dictation:

<http://www.quick-voice.com/quickvoice>

The QuickVoice app is the voice recording software that could be used for emails, lectures, you name it. It also has a built in audio editor.

7. Study Help:

<http://iphone.metricscat.com/developer/matthias-roell-504671> The PDF Connect app lets you navigate any PDF file and add notes into it, edit it, highlight it or even merge more than one PDF into one.

http://www.abbyy.com/textgrabber_ios/#prettyPhoto

The TextGrabber app lets you take a picture of any printed material with your IPAD and makes an electronic version of the picture image. It will translate it into English if it is another language. It will also let you email the new document to yourself in one click.
