357

Please provide any additional information about or descriptions of the supervised clinical experiences:

Students within all program options leading to NYS teaching certification are placed in clinical settings representing the full range of grade levels and developmental levels covered in their area of certification. We seek placements in districts and schools that meet the following criteria: 1. Good school climate; Hofstra students are welcome. 2. Cooperating Teachers genuinely enjoy children, teaching, and mentoring and have at least three years of teaching experience within the area of certification. 3. Cooperating Teachers are comfortable having the Hofstra student introduce new materials and methods in the classroom. 4. Placement is generally congruent with Hofstra's program objectives. It is our goal for Hofstra students to have opportunities to observe and plan lessons that: • integrate the language arts and Next Generation curriculum standards • actively engage learners in hands-on, inquiry based activities • value student voice and student decision-making • provide opportunities for students to make meaning from their experiences • respect students' diverse backgrounds • reflect positive classroom management • integrate curriculum and reflect thematic approaches • provide for student interaction and cooperative learning • emphasize process and the introduction of "big" ideas and concepts • utilize small group instruction and adapt to varied student needs • integrate appropriate technology Student teachers spend approximately 15 weeks in supervised clinical settings and typically are placed in two settings that address the full range of developmental/grade levels covered by their area of certification. Hofstra University faculty members observe students multiple times in each setting and conduct a weekly seminar with student teachers on campus. The goal is to develop reflective, activist, scholar practitioners who raise questions, look reflectively at their work, and make decisions about children, materials and curriculum that are informed by research. Both cooperating teachers and clinical supervisors evaluate student teachers under close clinical supervision and provide direct feedback. Student teachers are required to electronically submit all lesson plans in advance of teaching. Students also submit weekly reflections on their teaching practices and submit planning, instructional, and assessment commentaries. Faculty review student reflection documents. One program option provides close clinical supervision prior to student teaching. Undergraduate early childhood and childhood students have two semesters of close clinical supervision prior to student teaching. During these two semesters, students are placed in a school setting for 9 hours a week for 10 weeks. We observe students teaching small group lessons four times during each semester. These placements are associated with methods courses in social studies, language arts, mathematics and science. In addition, graduate level early childhood and childhood students have two semester of close clinical supervision prior to student teaching where they are placed in a school setting for 45 hours each over the course of both semesters. The secondary education program also provides for a close clinical supervision experience prior to student teaching. During the semester prior to student teaching, students are placed in a school setting for 10 hours per week for 5 weeks. Students are observed teaching small group lessons two times during each semester in their content area. These placements are associated with methods courses in social studies, English, mathematics, science, and languages other than English. The LOTE/TESOL Dual Program spans two semesters with LOTE being the primary certification area. An eight week ESL placement that includes 4 weeks at the elementary level and 4 weeks at the secondary level follows the full 15 week LOTE student teaching experience. The Physical Education/Health Dual Program involves an additional 5 week health student teaching placement after a full 15 week PE student teaching experience that is half at the elementary and half at the secondary levels.

Enrollment and Program Completers

In each of the following categories, provide the total number of individuals enrolled in teacher preparation programs for an initial teaching credential and the subset of individuals enrolled who also completed the program during the academic year.

(§205(a)(1)(C)(ii))

Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.

- Enrolled Student
- Program Completer

THIS PAGE INCLUDES:

>> Enrollment and Program Completers

Enrollment	and	Program	Comp	leters
-------------------	-----	----------------	------	--------

2021-22 Total

Asian Black or African American	25	19

Two or more races	8	3
No Race/Ethnicity Reported	10	6

Teachers Prepared

On this page, enter the number of program completers by the subject area in which they were prepared to teach, and by their academic majors. Note that an individual can be counted in more than one academic major and subject area. For example, if an individual is prepared to teach Elementary Education and Mathematics, that individual should be counted in both subject areas. If no individuals were prepared in a particular academic major or subject area, you may leave the cell blank. Please use the "Other" category sparingly, if there is no similar subject area or academic major listed. In these cases, you should use the text box to describe the subject area(s) and/or the academic major(s) counted in the "Other" category.

If your IHE offers both traditional and alternative programs, be sure to enter the program completers in the appropriate reports. For the traditional report, provide only the program completers in traditional programs within the IHE. For the alternative report, provide only the program completers for the alternative programs within the IHE.

After entering the teachers prepared data, save the page using the floating save box at the bottom of the page.

Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.

Academic Major

THIS PAGE INCLUDES:

- >> Teachers Prepared by Subject Area
- >> Teachers Prepared by Academic Major

Teachers Prepared by Subject Area

Please provide the number of teachers prepared by subject area for academic year 2021-22.

For the purposes of this section, number prepared means the number of program completers. "Subject area" refers to the subject area(s) an individual has been prepared to teach. An individual can be counted in more than one subject area. If no individuals were prepared in a particular subject area, please leave that cell blank. (§205(b)(1)(H))

What are CIP Codes?

No teachers prepared in academic year 2021-22

If your program has no teachers prepared, check the box above and leave the table below blank (or clear responses already entered).

What are CIP codes? The Classification of Instructional Programs (CIP) provides a taxonomic scheme that supports the accurate tracking and reporting of fields of study and program completions activity. CIP was originally developed by the U.S. Department of Education's National Center for Education Statistics (NCES) in 1980, with revisions occurring in 1985, 1990, and 2000 (https://nces.ed.gov/ipeds/cipcode/Default.aspx?y=55).

CIP Code	Subject Area	Number Prepared

13.1331	Teacher Education - Speech	31
13.1337	Teacher Education - Earth Science	2
13.14	Teacher Education - English as a Second Language	3
13.99	Education - Other Specify:	0

Teachers Prepared by Academic Major

Please provide the number of teachers prepared by academic major for academic year 2021-22. For the purposes of this section, number prepared means the number of program completers. "Academic major" refers to the actual major(s) declared by the program completer. An individual can be counted in more than one academic major. If no individuals were prepared in a particular academic major, please leave that cell blank. (§205(b)(1)(H))

Please note that the list of majors includes several "Teacher Education" majors, as well as several noneducation majors. Please use care in entering your majors to ensure education-specific majors and non-education majors are counted correctly. For example, if an individual majored in Chemistry, that individual should be counted in the "Chemistry" academic major category rather than the "Teacher Education—Chemistry" category.

What are CIP Codes?

Does this teacher preparation provider grant degrees upon completion of its programs?

Yes No

No teachers prepared in academic year 2021-22

If this provider does not grant participants a degree upon completion, or has no teachers prepared, leave the table below blank (or <u>clear responses already entered</u>).

CIP Code	Academic Major	Number Prepared
13.10	Teacher Education - Special Education	9

SECTION I: PROGRAM INFORMATION

Program Assurances

Respond to the following assurances. Teacher preparation programs should be prepared to provide documentation and evidence, when requested, to support the following assurances. (§205(a)(1)(A)(iii); §206(b))

			IDES

>> Program Assurances

Program Assurances

Note: This section is preloaded from the prior year's IPRC.
1. Program preparation responds to the identified needs of the local educational agencies or States where the program completers are likely to teach, based on past hiring and recruitment trends.
• Yes No
2. Preparation is closely linked with the needs of schools and the instructional decisions new teachers face in the classroom.
• Yes No
3. Prospective special education teachers are prepared in core academic subjects and to instruct in core academic subjects.
• Yes • No
Program does not prepare special education teachers
4. Prospective general education teachers are prepared to provide instruction to students with disabilities.
• Yes No
5. Prospective general education teachers are prepared to provide instruction to limited English proficient students.
Yes No

7. Prospective teachers are prepared to effectively teach in urban and rural schools, as applicable.

6. Prospective general education teachers are prepared to provide instruction to students from low-income families.

Yes

Yes No

No

8. Describe your institution's most successful strategies in meeting the assurances listed above:

All prospective teachers are provided with a variety of clinical settings during the course of their pre-practicum and student teaching experiences. These clinical settings expose prospective teachers to multi-cultural settings and varied populations of students. Clinical placements are tied to coursework that prepares candidates to create culturally relevant learning experiences. Our expectation is that candidates will demonstrate the ability to differentiate instruction for all learners including limited English proficient learners, students from low income families and students with disabilities. All prospective general education teachers are required to complete coursework and clinical placements in a special education setting as well as fulfill a clinical placement in a setting designated "high needs" by New York State. Although situated in a suburban setting, Hofstra University's close proximity to New York City provides opportunities for urban experiences for prospective teachers. Hofstra University participates in the New York City Department of

Education Teacher Learning Collaborative program. The richness of these clinical experiences provides an effective tool for training prospective teachers in the stipulated areas.	

Annual Goals: Mathematics

Each institution of higher education (IHE) that conducts a traditional teacher preparation program (including programs that offer any ongoing professional development programs) or alternative route teacher preparation program, and that enrolls students receiving Federal assistance under this Act, shall set annual quantifiable goals for increasing the number of prospective teachers trained in teacher shortage areas designated by the Secretary or by the state educational agency, including mathematics, science, special education, and instruction of limited English proficient students.

(§205(a)(1) (A)(i), §205(a)(1)(A)(ii), §206(a))

Note: Last year's goal and the current year's goal are preloaded from the prior year's IPRC.

• Quantifiable Goals

THIS PAGE INCLUDES:

- >> Report Progress on Last Year's Goal (2021-22)
- >> Review Current Year's Goal (2022-23)
- >> Set Next Year's Goal (2023-24)

Report Progress on Last Year's Goal (2021-22)

1. Did your program prepare teachers in instruction of limited English proficient students in 2021-22?

If no, leave remaining questions for 2021-22 blank (or <u>clear responses already entered</u>).

- Yes

2. Describe your goal.

The goal will be to recruit at least 8 students.

- 3. Did your program meet the goal?
 - Yes
 - No
- 4. Description of strategies used to achieve goal, if applicable:
- 5. Description of steps to improve performance in meeting goal or lessons learned in meeting goal, if applicable:
- 6. Provide any additional comments, exceptions and explanations below:

Review Current Year's Goal (2022-23)

8. Describe your goal.

No

The goal will be to enroll 8 students.

Set Next Year's Goal (2023-24)

9. Will your program prepare teachers in instruction of limited English proficient students in 2023-24? If no, leave the next question blank.

10. Describe your goal.

The goal is to enroll 10 students.

Assessment Pass Rates

The pass rates table is populated from files provided by the testing company or state. The table provides information on the performance of the students in your teacher preparation program on each teacher credential assessment used by your state. In cases where a student has taken a given assessment more than once, the highest score on that test is used. In the case of a teacher preparation program with fewer than 10 scores reported on any single initial teacher credential assessment during an academic year, the program shall collect and publish information with respect to an average pass rate and scaled score on each state credential assessment taken over a three-year period. (§205(a)(1)(B))

Please note that this page does not have an edit feature as the pass rates have already been through several rounds of verification. If you identify an error, please contact RTI's Title II Support Center and your testing company representative.

All program completers, 2019-20	199	186	93

SECTION IV: LOW-PERFORMING

Low-Performing

Provide the following information about the approval or accreditation of your teacher preparation program. (§205(a)(1)(D), §205(a)(1)(E))

Note: This section is preloaded from the prior year's IPRC.

1. Is your teacher preparation program currently approved or accredited?

THIS PAGE INCLUDES:	
>> Low-Performing	

Low-Performing

	Yes No
ı	f yes, please specify the organization(s) that approved or accredited your program:
Į.	✓ State
	CAEP
	AAQEP
ŀ	Other specify:
	Middle States, accredited by TEAC, members of AAQEP

2. Is your teacher preparation program currently under a designation as "low-performing" by the state?

Ye

No

SECTION V: USE OF TECHNOLOGY

Use of Technology

On this page, review the questions regarding your program's use of technology, and update as needed.

Note: This section is preloaded from the prior year's IPRC.

		IDES:

>> Use of Technology

Use of Technology

1. Provide the following information about the use of technology in your teacher preparation program. Please note that choosing 'yes' indicates that your teacher preparation program would be able to provide evidence upon request. (§205(a)(1)(F))

Does your program prepare teachers to:

- a. integrate technology effectively into curricula and instruction
 - Ye

No

- b. use technology effectively to collect data to improve teaching and learning
 - Yes

No

- c. use technology effectively to manage data to improve teaching and learning
 - Yes

No

- d. use technology effectively to analyze data to improve teaching and learning
 - Yes

No

2. Provide a description of the evidence that your program uses to show that it prepares teachers to integrate technology effectively into curricula and instruction, and to use technology effectively to collect, manage, and analyze data in order to improve teaching and learning for the purpose of increasing student academic achievement. Include a description of the evidence your program uses to show that it prepares teachers to use the principles of universal design for learning, as applicable. Include planning activities and a timeline if any of the four elements listed above are not currently in place.

SPECIAL EDUCATION: All special education programs integrate technology into curricula and instruction. The special education programs include hybrid and/or on-line courses that not only actively engage students but model the strengths of technology in instruction. In addition to the use of Blackboard, Smartboard, Voice thread, Screencast-o-matic and other applications, faculty has been trained in the use of Universal Design for Learning (UDL) through CAST. Pre-service teachers are required to take SPED 277 Technology and Assistive Technology in Special Education, a course dedicated to the use of assistive technology in education and life skills, and the introduction of Universal Design for Learning and its application in curriculum and instruction (The course is given in the online format. Students interact and produce lesson planning that integrates high levels of technology. All graduate courses are offered online or hybrid and they include SPED 201, SPED 209, SPED 211, SPED 216, SPED 248, SPED 241, SPED 242, SPED 246, SPED 247, SPED 263, & SPED 265). SPED 245 Curriculum and Methods for Students With Diverse Learning Needs, a curriculum and methods course, requires the use of an UDL lesson plan and instruction with multiple means of representation, engagement, and expression, during a six week tutorial that pre-service teacher participate in. At that time all students work one on one with students employing UDL as the foundation of their teaching. Student s are required to incorporate interactive, web-based, and hands-on learning resources as well as assistive technology (as needed) into their instruction. Assessment courses (including SPED 216 and SPED 242, provide pre-service teachers with the knowledge of using technology to collect, manage, and analyze data in order to look at student achievement. Now with the IDEIA mandate, Response to Intervention, SPED 216, Assessment and Diagnosis in Early Childhood Special Education and SPED 242 Psychoeducational Assessment in Special Education, SPED 246, The Educati

```
Strategies for Students with Disabilities, Grades 7-12, are expanding to include detailed work in progress monitoring which will help pre-service teacher
assess the effectiveness of their instruction. In SPED 247 Creating Effective Learning Communities: New Directions in Classroom Management
students work extensively with functional behavioral analysis and application of that knowledge and skill in authentic case studies course focused on
student assessment and developing a student profile to be used for instruction and the development of an individual education plan. PHYSICAL
EDUCATION: The physical education curricula include completely online and hybrid courses, and individual courses make extensive use of the functions
of the Blackboard LMS system (such as voice thread, discussion board, assignments, tests) as well as online resources provided with textbooks (online
labs, videos, and other learning experiences). Specific examples of integration of technology into instruction in the following courses is listed below:
PESP 13a Motor Development: Students use digital video to analyze fundamental motor skills and present their findings in a PowerPoint presentation.
Students complete online lab experiences related to fundamental motor skills. Students use computer software to collect, analyze and present data for
class lab experiences. PESP 53: Foundations of Physical Education & MSPE 256 Historical and Sociocultural Perspectives in Physical Activity and
Sport: Students complete the following projects related to technology: create a web quest, evaluate websites, retrieve and create teaching resources,
create brochures and newsletters, evaluate software. PESP 80 Programming Fitness Activities & MSPE 257 Implementing Health-Related Fitness and
Wellness in School Curricula: Students learn to use technology for fitness: computer software, heart rate monitors. PESP 167 Principles of Perceptual
Motor Learning: Students create a digital video of a skill demonstration/explanation. Students use computer software to collect, analyze and present
data for class lab experiences. Students complete online motor learning lab experiences. MSPE 208/PESP 108: Students use software to analyze and
report assessment data results. Students learn to use technology such as video and Plickers for assessment. MSPE 233 Essentials of Motor Behavior:
This is a completely online motor learning course. Student Teaching: Students must demonstrate and document the use of a variety of instructional
technology in their teaching. They must also learn how to edit and upload video for the NYSED teacher performance assessment. Uses technology
effectively to collect data to improve teaching and learning in the following courses: HSCI 106: Students learn to use technology to collect data related to
exercise: blood pressure, heart rate, etc. MSPE 208/PESP 108: Students use software to analyze and report assessment data results. Students learn
to use technology such as video and Plickers for assessment. Uses technology effectively to manage data to improve teaching and learning: PESP 80,
MSPE 257: Students use the Physical Best fitness software to analyze and present data. MSPE 208/PESP 108: Students use software to analyze and
report assessment data results. Students learn to use technology such as video and Plickers for assessment. Uses technology effectively to analyze
data to improve teaching and learning: PESP 104 Methods and Materials for Teaching at the Secondary Level, MSPE 260 Planning and Implementing
Secondary Physical Education Experiences, MSPE 256 Historical and Sociocultural Perspectives in Physical Activity and Sport: Students use the
SOFIT system to systematically observe teaching and collect and analyze data. MSPE 208/PESP 108: Students use software to analyze and report
assessment data results. Students learn to use technology such as video and Plickers for assessment. Universal Design for Learning: The physical
education program also incorporates the use of Universal Design Principles in many of its courses: PESP 13a & 167 Motor Development and Motor
Learning: The theoretical basis for the approach taken in these classes – Dynamic Systems Approach – emphasizes that motor skill development,
learning, and performance are a result of the interactions between the individual, task and environment. The goal in teaching then becomes identification
and manipulation of key constraints to guide learners in their search for the optimal movement solution to achieve the task goal. Inherent in this approach
is the attention to the individual. In these classes students learn principles for arranging the learning environment to meet the needs of the learner. In
PESP 13a attention is focused on individual, task, and environmental constraints affecting the development and performance of fundamental motor
skills across the lifespan. In PESP 167 students focus on how physical skills are produced, controlled, and learned and about the effects of individual,
task and environmental constraints those processes with a view toward maximizing the learning experience for each individual learner. The importance
of providing multiple, flexible methods of presentation and expression is emphasized. Throughout the major physical education classes in the curriculum,
students have a variety of assignments such as designing web quests, making and using visual aids (posters, graphic organizers, etc.), creating and
using PowerPoint presentations and digital videos, as well as giving effective demonstrations and explanations. PESP 80: Programming Fitness
Activities: Students learn to implement developmentally appropriate fitness programs, including consideration of assessment, content, and influence of
gender, multicultural issues and socioeconomic factors on fitness. PESP 154/MSPE 242, PESP 103/MSPE 260: Elementary Content, Methods, and
Secondary Methods classes emphasize the more practical aspects of creating learning experiences that meet individual needs. The use of
differentiated instruction and creating, supervising, and managing safe, developmentally appropriate progressive practice activities is emphasized and
assessed in practice teaching episodes both in class and in field experiences. Methods for promoting learning in the affective area (personal and social
responsibility) is also emphasized. Special emphasis is given to the variety of experiences available through the use of adventure education (PESP
119). Students use video cameras as well as software to edit and compress videos of themselves teaching. Students submit an electronic notebook of
work related to their field placement. MSPE 208/PESP 108: Assessment in Physical Education: Students learn to use a variety of assessment
strategies and instruments to enhance and provide accountability for the teaching-learning process in physical education. Emphasis is on the selection
and use of developmentally appropriate assessment strategies and instruments, including computers and other technology congruent with physical
activity learning goals. MSPE 262/PESP 170/170A: Adapted Physical Education and Field Experience: This class is specifically focused on helping
students to learn to provide effective movement learning experiences and fitness activities for people with disabilities. Students submit an electronic
notebook of work related to their field placement. Student Teaching: In this capstone experience, students are expected to demonstrate competency in
each of the UDL Principles. Evidenced for this is provided in the Student Teaching Handbook assignment and assessment descriptions as well as in the
student teaching rubric. The physical education program requires teacher candidates take a course in adapted physical education that focuses on a
wide variety of specific disabilities and curriculum and method applications across the range of disabilities. As part of this course they are required to
complete a supervised 20-hour field experience in placements in which they will experience a variety of disabilities and programming. The course also
covers legal responsibilities of teachers. As part of this course students also teach sample lessons to accommodate specific disabilities and develop
IEPs. The programs include foundation courses which cover the legal responsibilities of teachers and the role of educators in the general education and
special education process. TEACHING LEARNING AND TECHNOLOGY (TLT): The TLT department prepares teachers to integrate technology
effectively into curricula and instruction in a variety of ways. Faculty model the use of various types of technology in the classroom during different
courses including the use of such methods as Smart Board or Podcasting. Students then have the opportunity to use the technology in activities and
presentations in the classroom. For example, in ELED 227 Elementary School Curriculum students select a theorist and then present the background
and educational impact of the theorist. For their presentation they must use a form of technology like Power Point to make their presentation to their
peers. In SED 151 The Secondary School Teacher and SED 264 General Methods of Teaching students present a motivational activity using different
forms of technology to hook the class into the learning of the new content. In ELED 205 Language in the Curriculum, students go to interactive websites
to add activities to their thematic units to help build the background knowledge of the students they will teach. Along with this, faculty present to students
```

different methods of gathering data on the students they will be teaching by using technology. This might take the form of demonstrating what websites are good resources for building and developing rubrics or how to create a survey that will provide information about students' interests. Along with this, faculty use the National Library of Virtual Images to make concepts come alive. This also helps build background knowledge for the diverse needs of the students. It should also be noted that teachers in our science classes like ELED 128 Interdisciplinary Perspectives on Teaching Mathematics and Science in Early Childhood and Elementary Curriculum and ELED 208 Interdisciplinary Perspectives on Teaching Mathematics and Science in Early Childhood and Elementary Curriculum use tools in the garden and chemicals in their classes to demonstrate concepts that they are learning. In special methods classes in SED 290-299 students do demonstration lessons using a variety of technologies. For example, in SED 294 Instructional Patterns for Social Studies students learn how to design memes and brief videos advertising political campaigns from the past using a variety of technologies and programs. Students then use this information in the classrooms that they are participating in their field experience. The principles of universal design are included in all of our classes. Our child development courses focus on the development of the child as an individual and the need to interact with and create the appropriate environment for the student as an individual. In method courses faculty have students create lessons that include differentiated instruction. The goal for these lessons is to meet the needs of the individual learner. These lessons will have a variety of tasks that students can choose from that will demonstrate what they have learned. Along with creating a classroom environment that suits the learning styles of students, teachers include choice as an important aspect of their lesson design. For example in ELED 205 Language in the Curriculum, students participate in literature circles and select the books they will read. This is done to differentiate by abilities and interests. A similar activity occurs in a joint project between literacy and social studies. In their classes of ELED 127 Integrated Teaching of Reading, Writing and Children's Literature: Elementary Education Grades 1-6 /ELED 136 Integrated Teaching of Emergent Reading, Writing, and Children's Literature: Early Childhood Education and ELED 125 Child Development in the School Setting, Home and Community /ELED 135 Interdisciplinary Teaching of Social Studies; Early Childhood, students select and then read biographies in literature circles. Students meet in groups that they select that are appropriate to their interests and needs. In addition, In the B.S. In Education, Dance Education Program, students take the course Educational Technology in Dance Education, where they learn to use applications that support the deepening of learning in dance. Students learn to shoot and edit video; edit music with voiceovers; use Smartboard technology; and use and apply free applications such as Prezi, Pinterest, Fakebook, Glogster, and iPad apps to engage students. They also make their own blog to document their use of technology in dance education.

SECTION VI: TEACHER TRAINING

Teacher Training

Provide the following information about your teacher preparation program.

(§205(a)(1)(G))

Note: This section is preloaded from the prior year's IPRC.

ГНIS			

>> Teacher Training

Teacher Training

- 1. Provide a description of the activities that prepare general education teachers to:
 - a. Teach students with disabilities effectively

The primary goal of our program is to provide a comprehensive educational program for all students. Each program includes coursework that specifically addresses teaching students with disabilities effectively and participating as a member of individualized education program teams. Our goal is to ensure that all students have effective instruction. Therefore, Response To Intervention (RTI) is examined in our instructional program. This model moves from remediation to intervention. This requires careful consideration because we want to design effective curriculum that helps to avoid classifying a child. We want our students to understand how a child is responding to strategies and instruction and when intervention is needed. Our program helps teachers recognize what techniques can be used to support the struggling learner.

b. Participate as a member of individualized education program teams, as defined in section 614(d)(1)(B) of the *Individuals with Disabilities Education Act*.

Each program includes coursework that specifically addresses teaching students with disabilities effectively and participating as a member of individualized education program teams. Most courses include field experiences that require pre-service teachers to work with students, applying coursework to practice. Pre-service teachers at the childhood and secondary levels take courses on specific disabilities and curriculum and method applications across the range of disabilities. Preservice teachers at the early childhood level take courses across the developmental domains, and in curriculum and methods. All programs include foundation courses which cover the legal responsibilities of teachers and the role of educators in the general education and special education process. This knowledge is further developed in curriculum and methods courses and issue courses in which students develop IEPs from case studies, and discuss the specific roles and responsibilities of all members of the team.

c. Effectively teach students who are limited English proficient.

Hofstra offers two programmatic options that meet the needs of those general education students who seek to develop expertise in teaching English Language Learners in their classrooms. First, the MS in Education, TESOL programs has an in-service track. In-service MS in Education candidates hold undergraduate degrees and prior certifications in a range of areas, such as childhood education, special education and teaching special subjects. Additionally, Hofstra offers a post-masters certificate of advanced study (CAS), TESOL program. CAS TESOL candidates hold graduate degrees and teaching certifications across the range of educational domains. In addition, our program provides for teaching students with disabilities and limited English learners through the use of differentiated instruction. Differentiation instruction in our program refers to differentiating the content, process, and / or product. This is achieved by the assessment of students and the use of flexible grouping which reflects students' readiness, interest and learning profile. In addition, centers are used to further facilitate differentiated activities for all students. We have a graduate program devoted to supporting students ELL learners. Additionally, our curriculum is designed to support all students' cultural differences. Our literature is multicultural. This point of view cuts across all subject areas, and addresses the histories and experiences of people who have been left out of the curriculum. Its purpose is to help us deal equitably with all the cultural and racial differences that you find in the human family. It is also a perspective that allows us to get at explanations for why things are the way they are in terms of power relationships, in terms of equality issues. The TESOL immigration studies courses examine sociological and ethnographic studies of immigrant communities and interpret research data for their implications for instruction. Further, TESOL linguistic classes investigate findings in the areas of Second Language Acquisition with the special focus on the development constraints and opportunities of L2 learning. These linguistic classes draw the link between research findings and classroom practice placing special emphasis on the findings in neurolinguistics to prepare teacher learners engage in brain-compatible pedagogy. Finally, TESOL pedagogy classes seek to push TESOL instruction into the farthest reaches of ELLs' zones of proximal development and to prepare teacher learners to develop rigorous, standards-based instruction that enables ELLs have enriching and meaningful academic experiences. The physical education program requires teacher candidates take a courses in adapted physical education that focuses on a wide variety of specific disabilities and curriculum and

method applications across the range of disabilities. As part of this course they are required to complete a supervised 15-hour field experience in placements in which they will experience a variety of disabilities and programming. The course also covers legal responsibilities of teachers. As part of this course students also teach sample lessons to accommodate specific disabilities and develop IEPs. The programs include foundation courses which cover the legal responsibilities of teachers and the role of educators in the general education and special education process.

2. Does your program prepare special education teachers?

Yes

If yes, provide a description of the activities that prepare special education teachers to:

a. Teach students with disabilities effectively

The Special Education Programs (Masters in Special Education, Masters in Early Childhood Special Education, Masters in Inclusive Elementary Special Education, Masters in Inclusive Secondary Education, Masters in Inclusive Early Childhood Education, Master in Special Education and Literacy, Masters in Secondary Special Education Generalist, Masters in Students with Disabilities 7-12 Masters in Special Education/Tesol, Generalist, w/extension in secondary education, Masters in Applied Behavior Analysis, Advanced Certificate in Early Childhood Special Education, Advanced Certificate in Teaching Students with Severe and Multiple Disabilities and Advanced Certification Childhood Special Education, Advanced Certificate in ABA, Advanced Certificate in Teaching the Gifted) all include coursework that specifically addresses teaching students with disabilities effectively, participating as a member of individualized education program teams, and teaching students who have limited English proficiency. Most courses include field experiences that require pre-service teachers to work with students, applying coursework to practice. Pre-service teachers at the childhood and secondary levels take courses on specific disabilities and curriculum and method applications across the range of disabilities. Preservice teachers at the early childhood level take courses across the developmental domains, and in curriculum and methods. All programs include foundation courses which cover the legal responsibilities of teachers and the role of educators in the general education and special education process. This knowledge is further developed in curriculum and methods courses and issue courses in which students develop IEPs from case studies, and discuss the specific roles and responsibilities of all members of the team.

b. Participate as a member of individualized education program teams, as defined in section 614(d)(1)(B) of the *Individuals with Disabilities Education Act*.

The Special Education Program includes coursework that specifically addresses teaching students with disabilities effectively and participating as a member of individualized education program teams. Most courses include field experiences that require pre-service teachers to work with students, applying coursework to practice. Pre-service teachers at the childhood and secondary levels take courses on specific disabilities and curriculum and method applications across the range of disabilities. Preservice teachers at the early childhood level take courses across the developmental domains, and in curriculum and methods. All programs include foundation courses which cover the legal responsibilities of teachers and the role of educators in the general education and special education process. This knowledge is further developed in curriculum and methods courses and issue courses in which students develop IEPs from case studies, and discuss the specific roles and responsibilities of all members of the team.

c. Effectively teach students who are limited English proficient.

Cultural competency and culturally responsive instruction as well as the needs of English language learners are part of all courses and discussed in particular detail in the required course concerning building relationships with parents of children with disabilities. This course was revised to reflect more in-depth instruction of working with English language learners. Hofstra offers a masters degree in childhood special education/TESOL. Faculty have been trained in Universal Design for Learning which is being used in courses both as a teaching model and a pedagogical approach. In employing UDL for instruction students focus on making curriculum accessible to as many students as possible by removing barriers. At times those barriers include the English language and therefore require that students consider strategies and representation, engagement, and expression which will enable English Language Learners to access curriculum with the appropriate instruction. It is a knowledge base that we are in the process of developing in all courses. The special education program offers programs to meet new certification requirements including early childhood/childhood dual program, BCBA in autism and special education/TESOL. Efforts are underway to develop other inclusive education programs in teacher education.

Contextual Information

Please use this space to provide any additional information that describes your teacher preparation program(s). You may also attach information to this report card (see below). The U.S. Department of Education is especially interested in any evaluation plans or interim or final reports that may be available.

(1) The teacher education and educational leadership programs of the School of Education are accredited under the Teacher Education Accreditation Council (TEAC) Quality Principles through the CAEP Accreditation System, for a period of seven years, from October 28, 2014 to October 28, 2021. In spring 2019 the School of Education (SOE) switched accrediting agencies and is now a member of the Association for Advancing Quality in Educator Preparation (AAQEP). Due to this change, the next site visit for the SOE will be in the fall of 2024. Hofstra University is currently pursuing accreditation of its educator preparation programs by AAQEP. Pursuant to §52.21 of the Regulations of the Commissioner of Education, the educator preparation programs offered by Hofstra University will be continuously accredited for purposes of meeting the New York State requirement that all such programs maintain continuous accreditation. (2) During the spring 2019 semester Middle States conducted their site visit at Hofstra University, meeting with campus leaders, administrators, trustees, faculty, staff, and students over the course of their three day evaluation. The team's findings were extremely positive, with their report noting that "...Hofstra is providing an excellent education to its students." Additionally, the team was impressed by the University's leadership and commended our "clear goals and ... demonstrated competence in the execution of [our] strategy". Of particular note is the team's assertion that Hofstra's commitment to assessment and evaluation is "extraordinary ... prevalent and valued". As a result of all the hard work done by the Steering Committee, standard committees, and the University community at large, Hofstra's accreditation has been reaffirmed until the next visit, which will be scheduled for the 2027-2028 academic year.

Supporting Files

No files have been provided.

You may upload files to be included with your report card. You should only upload PDF or Microsoft Word or Excel files. These files will be listed as links in your report card. Upload files in the order that you'd like them to appear.

Report Card Certification

Please make sure your entire report card is complete and accurate before completing this section. Once your report card is certified you will not be able to edit your data.

Certification of submission

I certify that, to the best of my knowledge, the information in this report is accurate and complete and conforms to the definitions and instructions used in the Higher Education Opportunity Act, Title II: Reporting Reference and User Manual.

NAME OF RESPONSIBLE REPRESENTATIVE FOR TEACHER PREPARATION PROGRAM:

Daniel Seabold

TITLE:

Acting Dean

Certification of review of submission
